Leisureworld Senior Care Corporation

Financial Report
For the Quarters Ended
March 31, 2011 and 2010

(In Canadian Dollars)

This report for Leisureworld Senior Care Corporation ("Leisureworld" or the "Company") summarizes the financial results for the quarter ended March 31, 2011. This discussion and analysis of Leisureworld's consolidated operating results, cash flow and financial position for the quarter ended March 31, 2011 should be read in conjunction with the audited consolidated financial statements and related notes for the period ended December 31, 2010. This and additional information relating to the Company is available on SEDAR at www.sedar.com. The information contained in this report reflects all material events up to May 10, 2011, the date on which this report was approved by the Board of Directors of Leisureworld.

The discussion and analysis of the operating results for the quarter compare the consolidated operations of Leisureworld for the quarter to the combined results of Leisureworld Senior Care LP ("LSCLP") up to March 23, 2010, the date of acquisition, and the Company's results from March 23, 2010 to the end of the quarter. All financial information has been prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). All amounts have been expressed in thousands of Canadian dollars, unless otherwise noted.

Forward-looking statements

Certain statements in the following discussion and analysis may constitute forward-looking statements that involve known and unknown risks, uncertainties and other factors, which may cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. When used in the following discussion and analysis, such statements use words such as "may," "will," "expect," "believe," "plan" and other similar terminology. These statements reflect current expectations regarding future events and operating performance and speak only as of the date of this discussion and analysis. Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such results will be achieved.

The forward-looking statements contained in this discussion and analysis are based on information currently available and what management currently believes are reasonable assumptions, however, neither Leisureworld nor management can ensure actual results will be consistent with these forward-looking statements. These forward-looking statements are made as of the date of this discussion and analysis, and Leisureworld and management assume no obligation to update or revise them to reflect new events or circumstances. Leisureworld and management caution readers not to place undue reliance on any forward-looking statements, which speak only as of the date made.

Introduction

Leisureworld was incorporated under the laws of the Province of Ontario on February 10, 2010 and was continued under the laws of the Province of British Columbia on March 18, 2010. The Company closed its Initial Public Offering ("IPO") on March 23, 2010 and acquired, indirectly, all of the outstanding limited partnership interest in LSCLP and common shares of Leisureworld Senior Care GP Inc., the general partner of LSCLP.

Corporate overview
Leisureworld and its predecessors have been operating since 1972. Leisureworld is the third largest licensed long-term care ("LTC") provider in the Province of Ontario and the largest participant in the Canadian seniors housing sector that has focused almost exclusively on Ontario LTC. Leisureworld owns and operates 26 LTC homes (representing an aggregate of 4,314 beds), all of which are located in the Province of Ontario. Effective April 27, 2011, Leisureworld also owns and operates three retirement residences ("RR") (representing 323 suites) and one independent living ("IL") residence (representing 53 apartments) in the Province of Ontario. Ancillary businesses of the Company include: Preferred Health Care Services ("PHCS"), an accredited provider of professional nursing and personal support services for both community based home healthcare and LTC homes; Ontario Long Term Care ("OLTC"), a provider of purchasing services, as well as dietary, social work, and other regulated health professional services to Leisureworld homes; and Tealwood Developments ("Tealwood"), a provider of laundry services to the Leisureworld homes.

The objectives of Leisureworld are to: (i) provide shareholders with stable monthly dividends derived from revenues generated from income-producing LTC homes, seniors housing investments and community based services; (ii) enhance the long-term value of the Company's assets and maximize share value; and (iii) expand the asset base of the Company though accretive acquisitions and construction of new LTC and seniors living homes and other healthcare related business opportunities.

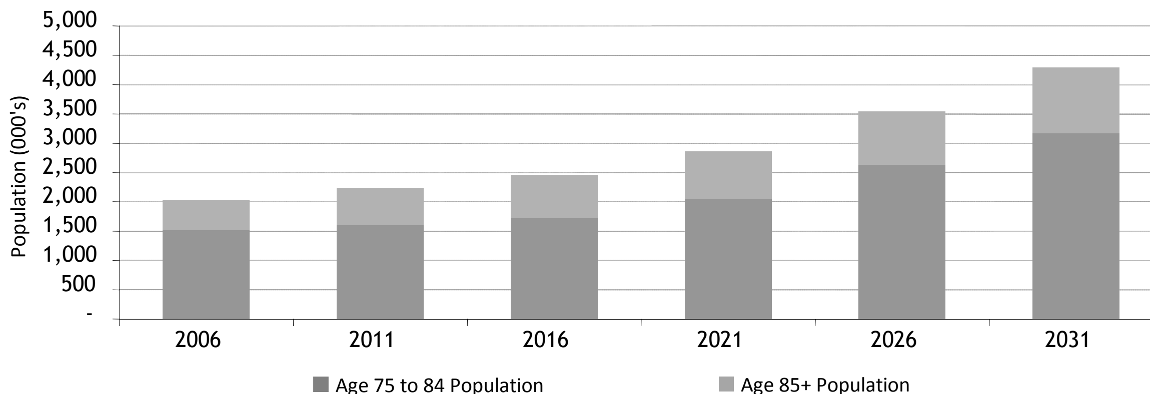
Industry overview
LTC homes are designed to accommodate seniors who require 24-hour per day care and suffer from cognitive or physical impairment. LTC homes offer higher levels of personal care and support than those typically offered by independent living facilities or retirement residences. All Ontario LTC homes must be licensed by the Ministry of Health and Long-Term Care ("MOHLTC"), are eligible for occupancy based government funding and are subject to government regulation and care standards. Residents of LTC homes are directly charged only for accommodation costs and, in the event these amounts are unaffordable for the residents, government subsidies are available to reduce the basic accommodation charge. Residents of LTC homes can pay a higher accommodation rate for private and semi-private accommodation ("preferred occupancy").

Retirement homes accommodate seniors who require minimal to moderate assistance with activities of daily living whereas independent living facilities accommodate seniors who require minimal or no assistance with daily living. Retirement homes in Ontario are now regulated but generally are not subsidized by the government. The "Retirement Homes Act, 2010" received Royal Assent on June 8, 2010. This legislation will provide consumer protection and does not provide funding for the provision of care and services in these facilities. There will be a delayed implementation of certain sections of the Act, including licensing provisions. Residents are generally responsible for the entire cost of accommodation and care. Management is currently reviewing the impact of the new legislation.

Demand and supply
The demand for seniors housing and programs continues to grow in the Province of Ontario. Management believes favourable demographics, increasing life expectancy, increasing seniors' affluence and changing family dynamics have and will continue to have a positive impact on demand for housing in LTC homes in the Province of Ontario.

- **Favourable demographics:** The primary demographic group living in LTC homes are Canadians who are greater than 75 years of age. According to Statistics Canada, the 75-plus and 85-plus age cohorts in Canada are anticipated to be among the fastest growing age cohorts over the next 20 years, with the 85-plus age cohort expected to increase approximately 23% between 2006 and 2011. The same cohorts are expected to more than double in population by 2031.

Estimated Population in Canada's 75 to 84 and 85+ Age Cohorts



Source: Statistics Canada estimates, as at June 26, 2008.

- **Increasing life expectancy:** Primarily as a result of advances in healthcare, Canada's population is aging. The average life expectancy for Canadians increased to 80.4 years in 2005 from 77.8 years in 1991, according to Statistics Canada. Additionally, the population of the Province of Ontario has one of the highest life expectancies in the developed world. The segment of the population aged 65 years and older is expected to more than double in size by 2031, further exacerbating problems with respect to the availability of LTC accommodation.

- **Increasing seniors' affluence:** Increases in net worth (largely as a result of the many seniors who now own their homes debt-free), combined with increased household incomes, allow seniors to afford a much higher quality housing product with greater amenities than at any time in the past. Seniors housing is now more upscale and residential, compared to the institutional feel that previously characterized such facilities. Instead of having to settle for multi-bed ward rooms, seniors can now choose to live in private or semi-private accommodation that more resembles hotel-style living than nursing homes of a previous generation. This arrangement also affords greater dignity and privacy to the senior receiving care and services.

- **Changing family dynamics:** With more and more families having both spouses working full-time outside of the home and changes in lifestyle reducing the ability of adult children to care for their aging parents, seniors housing facilities are an attractive option. There is also an increasing demand for home healthcare services as wait-lists for medical services and emergency room waits increase the demand for LTC services.

- **Demand for cost effective alternatives:** Rising healthcare costs have resulted in a reduction in the length of hospital stays and enhanced home healthcare services and, in turn, are a predominant factor in growing wait-list numbers. This has resulted in LTC homes increasingly being filled by residents with higher care requirements, leading to higher occupancy levels in LTC homes.

- **Recession stability:** The LTC industry has historically been largely insulated from economic cycles. This can be attributed to several factors: (i) seniors are generally retired and receiving stable, fixed and predictable income from private and public pensions, RRSPs and other fixed income investment securities; (ii) demand for LTC housing is not usually discretionary but driven by need, which does

not fluctuate during economic cycles; (iii) stability of tenure, as seniors, once having moved into a facility, are reluctant or unable to move to alternative accommodation; (iv) the continual increase in the demand for seniors accommodation with skilled nursing due to the demographics of the aging population; and (v) a high level of government funding and subsidization of fees.

Industry characteristics

LTC homes are social infrastructure assets as they provide essential health services. This sector can be distinguished from other sectors of the seniors housing industry based on a number of factors, including the following:

- **Provision of an essential service:** The Ontario LTC sector provides an essential service to Ontario communities. LTC licensed homes generally provide 24-hour nursing support, daily assistance with personal care and supervision throughout the day to individuals who may otherwise require hospital care.

- **Significant barriers to entry:** Barriers to entry are both regulatory and operational. The LTC sector in the Province of Ontario is regulated by the MOHLTC, which requires that, in order to operate as an LTC home and to receive government funding, a home must be licensed or receive a letter of approval to operate from the MOHLTC. In considering whether it is in the public interest to grant a licence to operate an LTC home, the MOHLTC takes into account certain prescribed factors, including licensed bed capacity in the area, health facilities in the area other than LTC homes providing nursing care, the number of applicants for nursing care and available funds. In addition, LTC homes in the Province of Ontario must be built to specified design criteria and funding is tied to the level of delivery of mandated care services. These regulations create significant barriers to entry in the LTC sector and restrict the supply of beds. Currently, there is an almost universal restriction on the issuance of new licences in the Province of Ontario due to funding implications. There are also restrictions on the transfer or reissuance of licences whereby new industry entrants are heavily scrutinized and, conversely, experienced LTC operators with a sophisticated understanding of the regulatory landscape, such as Leisureworld, often gain an advantage as preferred purchasers whose wait time for approvals may be shortened. In addition to the regulatory barriers to entry, the successful operation of an LTC home demands a broad range of expertise, which creates additional barriers to entry. The operational skills required include management of healthcare operations, maintenance, marketing, community relationships, labour relations, government relations and financing. Larger operators may be better able to address these required skills through dedicated head office staff responsible for specific functions, the cost of which may be allocated across multiple homes.

- **Sustainable competitive advantage:** LTC homes have a sustainable competitive advantage over other sectors in the Ontario seniors housing industry due to affordability for seniors and as a cost-effective alternative to Complex Continuing Care ("CCC") hospital beds for eligible patients.

- **Stability of revenues:** LTC homes tend to enjoy predictable revenue for the following reasons: (i) a significant portion of revenues generated by LTC homes are received from MOHLTC funding; (ii) LTC homes are characterized by consistently high occupancy levels; (iii) there is a stable trend in escalation of payments; and (iv) revenue from preferred accommodation is available.

LTC funding model

Ontario LTC homes are funded through a well-defined funding model. Licensed operators of Ontario LTC homes are entitled to operating subsidies (subject to annual reconciliation), as well as various capital renewal program payments. Provincial support for the Ontario LTC sector has been demonstrated by increased funding

commitments to the sector. Operational funding of LTC homes in the Province of Ontario is currently paid monthly and is divided into three "envelopes." Total operational funding received by operators includes a provincial government component and a direct charge to residents in respect of accommodation services. Each envelope is structured as a fixed amount per resident per day, or "rate." If an LTC home's average annual occupancy level meets or exceeds 97%, it is the MOHLTC's policy to provide funding based on 100% occupancy. The three envelopes include Nursing and Personal Care ("NPC"), Programs and Support Services ("PSS") and accommodation, which includes raw food.

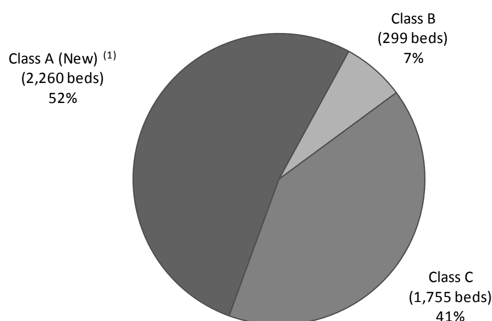
The MOHLTC categorizes and provides structural compliance and capital funding for homes according to four bed classes: Class A, which includes New, Class B, Class C and Class D. Capital funding is available to operators of LTC homes through Structural Compliance Premiums, Capital Cost Funding for New beds, Capital Cost Funding for Class B and C beds, Accreditation and several other revenue sources.

Business overview

LTC homes

Leisureworld's portfolio is comprised largely of New homes within the Class A category, which represent approximately 52% of Leisureworld's beds. Class B and C homes represent 7% and 41% of the portfolio, respectively. In addition, Leisureworld is well positioned to capitalize on the Capital Renewal Initiatives, which will provide funding to upgrade Class B and C homes.

Summary of LTC Beds by Class

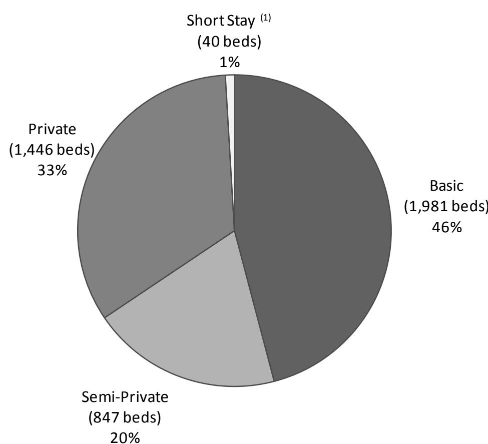


Note:

(1) All of Leisureworld's Class A homes are designated New, meeting or exceeding the MOHLTC's most recent (1998) design standards and qualifying for additional capital funding of $10.35 per day, per bed

A significant proportion of Leisureworld's LTC beds are designated as preferred accommodation with approximately 53% of beds designated as private or semi-private accommodation. Approximately 4% of the revenues and 25% of the Net Operating Income ("NOI") from Leisureworld's LTC operations are generated from charging residents the regulated premium of $18.00 and $8.00 per day per bed for private and semi-private accommodation, respectively.

Summary of LTC Beds by Accommodation Type



Note:

(1) Short stay and convalescent care beds are reserved for people requiring stays in a LTC home of less than 30 and 90 days, respectively. Short stay beds are designed to provide home caregivers with relief from their caregiving duties on a periodic basis. Convalescent care beds are typically used to provide resident support following a hospital stay. Short stay beds are funded at 100% occupancy regardless of actual occupancy and convalescent care beds are funded at 100% occupancy, provided average annual occupancy meets or exceeds 80%. In addition, convalescent care beds earn additional funding as a result of the higher level of care required.

Retirement and independent living residences

Leisureworld owns and operates one RR consisting of 29 suites that adjoins the Muskoka LTC home, and one IL residence comprising 53 apartments that is attached to the Scarborough LTC home. These two homes have maintained a combined average of occupancy above 90% and are integral to seniors services provided within their local communities. On April 27, 2011, Leisureworld acquired two RR comprising 294 suites located in Kingston, Ontario and Kanata, Ontario. The residences are new luxury retirement living properties featuring top quality amenities and will be marketed under the Company's 'The Royale' brand. As new properties, both residences are currently in the lease-up period with current occupancy being 52% at Kingston and 41% at Kanata. The RR will have to comply with the requirements of the Retirement Homes Act, which received Royal Assent on June 8, 2010.

Preferred Health Care Services

PHCS offers homecare, education and training, and relief staffing services. These services either complement or support the core nursing home operations of Leisureworld. PHCS effectively broadens Leisureworld's presence across the continuum of care. PHCS has been providing professional nursing and personal support services in the community and LTC homes since 1987. Employees of PHCS include registered nurses, registered practical nurses, foot care nurses, companions and personal support workers who work on a permanent full-time, part-time or elect-to-work basis. Elect-to-work employees are not guaranteed any minimum amount of work. Employees are non-unionized and salaries are dictated by the market.

Ontario Long Term Care and Tealwood

OLTC acts as a central purchasing agent for all of the Leisureworld homes. OLTC negotiates purchasing agreements with third party providers on behalf of Leisureworld's LTC homes. It is also the employer of specialized personnel, which include registered dieticians, social workers and other professional consultants.

Tealwood is a subsidiary company of Leisureworld, which provides laundry services for certain Leisureworld homes.

Key performance drivers

There are a number of factors that drive the performance of Leisureworld:

Government funding ensures stability of cash flow

Ontario's LTC sector is regulated by the MOHLTC according to a defined funding model. This model contributes to the stability of Leisureworld's cash flow. Operational funding, paid monthly, is divided into three envelopes: NPC; PSS; and accommodation. Approximately 70% of revenue from Leisureworld's LTC homes is received from the MOHLTC. Over the past ten years, government funding of Leisureworld's LTC homes has increased in excess of the consumer price index. Leisureworld also receives capital cost funding of up to $10.35 per bed, per day from the MOHLTC for Class A homes, as well as payments from residents for both basic and preferred accommodation. Leisureworld also receives structural compliance premiums from the MOHLTC, of $2.50 and $1.00, on a per resident per day basis, for Class B and C homes, respectively. Additionally, the MOHLTC provides funding to LTC homes that have been accredited by Accreditation Canada and reimburses up to 85% of property and capital tax costs.

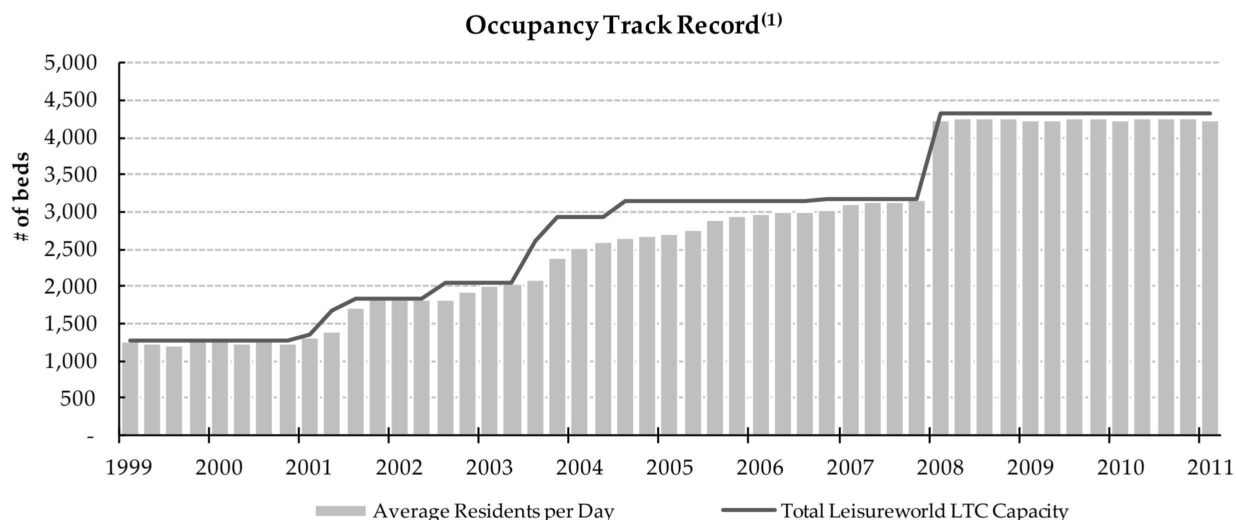
In 2007, the MOHLTC committed to a capital renewal program that will provide additional funding to operators to upgrade the province's 35,000 Class B and C homes to Class A standards, thereby improving the overall quality and comfort of accommodation available to residents. In April 2009, the MOHLTC published an updated design manual and policy for funding construction costs for the redevelopment of Class B and C LTC homes. The funding for these redevelopment projects will be in the form of a 25-year commitment from the MOHLTC, to pay a specific amount per bed, per day, which depends on the actual construction cost and also the building's compliance with Leadership in Energy and Environmental Design ("LEED") design standards. Redevelopment of Leisureworld's Class C homes is expected to occur under this program in the years ahead.

PHCS provides home care services that help individuals remain independent and active in their homes. Funding for such services is provided by Community Care Access Centres ("CCAC"). CCAC were created by the MOHLTC partially to administer publicly funded home care in the Province of Ontario. PHCS holds three CCAC contracts.

Occupancy levels enhance cash flow

Occupancy is a key driver of Leisureworld's performance. An LTC home that meets or exceeds 97% annual average occupancy receives funding from the MOHLTC based on 100% occupancy. Leisureworld has a strong record of increasing capacity and occupancy. In addition, the supply of LTC beds is controlled and regulated by the government, which ensures barriers to entry. For the quarter ended March 31, 2011, Leisureworld's average occupancy was 98.0% (Q1 2010 – 98.2%).

In addition, the demand for LTC homes is dictated by a need for care, driven by demographic trends rather than changes in the economy. According to the Ontario Ministry of Finance, the number of people aged 65 years and older will nearly double to about 3.5 million, or 21.4% of the province's population, in 2031, up from 1.6 million, or 12.9% of the population currently.



Note:

(1) Includes only LTC beds.

Optimization of private accommodation mix increases operating profitability
An LTC home that provides basic accommodation for at least 40% of residents may offer the remaining residents private accommodation at a regulated premium. The LTC home operator retains the premiums collected for such accommodation, which typically increases revenue and enhances profitability. The premium for a private room is currently $18 per day. Leisureworld has approximately 33.5% of the beds designated as private accommodation. Private bed average total occupancy for the quarter ended March 31, 2011 was 95.9% (Q1 2010 – 96.9%).

Disciplined cost management is key to operating profitability
Leisureworld enjoys economies of scale in areas such as hiring, purchasing and administration for its LTC homes. Long-term care operators in Ontario receive funding from the government. Operators must return any funding that is not spent for the NPC, PSS, and raw food envelopes to the government; however, spending in excess of the government funding is paid by the LTC operator. Leisureworld manages costs prudently to ensure it continues to provide quality accommodation and services, while maximizing operating profit.

Ensuring high-quality care and services to all residents
A culture of quality is fostered by a corporate team that measures, monitors and audits Leisureworld's performance in care and in services. Engagement with management and staff at all levels, through discussion and disseminating reports, analysis and recommendations, is an ongoing process. The outcome of these encounters is also connected to establishing best practices, revisions to benchmarks and is used to develop training and educational initiatives.

Providing professional on-site administration of well-operated Leisureworld homes
Each home has its own on-site management team that is supported through regional and corporate staff who have areas of more focused expertise. Management of each Leisureworld home is supported by networking

with other homes through internal conferences, home comparative management reports and involvement in project teams.

Ensuring continued maintenance and upgrade of properties

Capital budgets, operational reviews and equipment/building service contracts support planning and monitoring of Leisureworld's physical assets. Leisureworld has established an active, ongoing maintenance approach, which helps ensure appropriate preventative maintenance and that the Leisureworld homes operate efficiently and competitively.

Growth strategies of Leisureworld Senior Care Corporation

Management has identified both internal and external growth opportunities. Organic growth opportunities include project development under the Capital Renewal Initiatives, as well as an increase in the number of home healthcare contracts. External growth strategies include LTC acquisitions, expansion across the continuum of care, and geographic extension.

Organic

Leisureworld anticipates participating in the MOHLTC's Capital Renewal Initiatives, under which 12 Class B and Class C homes would be eligible for refurbishment. This strategy includes both the downsizing and retrofitting of certain of its homes as well as new home construction. Ultimately, the program is expected to extend licence terms at newly developed homes and increase preferred bed revenues. In addition, Leisureworld's PHCS business stands to benefit from the stated intention by the Government of Ontario to increase investment in community based services, which includes home healthcare services. As a result of the government initiative, management expects to obtain additional home healthcare contracts, which will ultimately result in PHCS becoming a larger participant in this sector.

External

Management believes a large number of LTC acquisition targets exist as a result of the fragmented nature of the LTC industry. Additionally, Leisureworld intends to target older LTC homes with limited redevelopment opportunities and implement the transportation of licensed capacity from those homes to Leisureworld's existing portfolio. Opportunities also exist for Leisureworld to expand in the RR and IL segment of senior housing through acquisition and development. Finally, management anticipates opportunities to diversify Leisureworld's portfolio into other regions of Canada through acquisitions.

Non-GAAP performance measures

Funds from operations ("FFO"), adjusted funds from operations ("AFFO") and net operating income ("NOI") are not measures recognized under GAAP and do not have standardized meanings prescribed by GAAP. FFO, AFFO and NOI are supplemental measures of a company's performance and Leisureworld believes that FFO, AFFO and NOI are relevant measures of its ability to pay dividends on the Company's common shares. The GAAP measurement most directly comparable to FFO, AFFO and NOI is Net Income. See "Business Performance" for a reconciliation of NOI, FFO and AFFO to Net Income.

"FFO" is defined as net income computed in accordance with GAAP, excluding gains or losses from sale of depreciable real estate and extraordinary items, plus the interest portion of capital subsidy receivables, plus amortization, plus future income taxes. In the opinion of management, the use of FFO, combined with the required primary GAAP presentations, is fundamentally beneficial to the users of the financial information, and improves their understanding of the operating results of Leisureworld. Management generally considers FFO to be a useful measure for reviewing Leisureworld's operating and financial performance because, by excluding real estate asset amortization (which can vary among owners of identical assets in similar condition

based on historical cost accounting and useful life estimates), FFO can help users of the financial information compare the operating performance of Leisureworld's real estate portfolio between financial reporting periods.

"AFFO" is defined as FFO plus the principal portion of capital subsidy receivables and, amounts received from income guarantees less maintenance capital expenditures ("capex"). Other adjustments may be made to AFFO and determined by the Board at its discretion. Management believes AFFO is useful in the assessment of Leisureworld's operating performance for valuation purposes, and is also a relevant measure of the ability of Leisureworld to earn cash and pay dividends to shareholders.

"NOI" is defined as operating revenues after direct operating expenses have been deducted, but before deducting net head office expenses, net interest expense, amortization expenses, general and administrative expenses, income taxes, leasehold improvement and leasing costs, and unrecoverable capital costs.

FFO, AFFO and NOI should not be construed as alternatives to net income (loss) or cash flow from operating activities determined in accordance with GAAP as indicators of Leisureworld's performance. Leisureworld's method of calculating FFO, AFFO and NOI may differ from other issuers' methods and accordingly, these measures may not be comparable to measures used by other issuers.

Business performance

In the quarter ended March 31, 2011, NOI increased by $360 or 3.7% to $10,106 primarily due to government funding increases to enhance resident care and cost containment measures across the portfolio. In addition, PHCS NOI was $43 higher due to an increase in personal support contract volumes. FFO at $3,644 increased by $9 or 0.2% due to the increase in NOI and lower net interest expense being partly offset by a reduction in interest income on the construction funding receivable and increases in income taxes and general and administrative expenses. The increase in general and administrative expenses was largely due to expenses of $449 relating to the acquisition which closed on April 27, 2011. AFFO for the quarter ended March 31, 2011 was $5,162 which was $683 or 15.2% higher than the first quarter of 2010 due to the add-back to FFO of tax-effected transaction costs, increased construction funding principal and lower maintenance capital expenditures.

Notes:
(1) The Year Ended December 31, 2010 presentation is the total of LSCLP results of operations pre-initial public offering for the period from January 1, 2010 to March 22, 2010 combined with the results of the Company for the post-initial public offering period of March 23, 2010 to December 31, 2010.

(2) Quarters ended in 2009 are in accordance with Canadian GAAP as at December 31, 2010, not adjusted for IFRS.

(3) All dividends paid by the Company, unless otherwise indicated, are designated as eligible dividends for Canadian tax purposes in accordance with subsection 89(14) of the Income Tax Act (Canada), and any applicable corresponding provincial and territorial provisions.

The quarterly results of the Company are subject to various factors including, but not limited to seasonality of utility expenses, timing of government funding rate increases and the timing of revenue recognition to match spending under the flow-through envelopes. Year-over-year comparisons are more appropriate than comparing sequential quarters due to the above factors.

Following the Company's conversion to IFRS, General and administrative expenses for the quarters ended March 31, 2011, December 31, 2010 and September 30, 2010, include transaction costs of $449, $9 and $26; respectively.

In the quarter ended December 31, 2009, management reduced its estimate of sick time allowance by $1,837 and following the IPO in the quarter ended March 31, 2010, the Company's general and administrative expenses increased.

In the quarter ended September 30, 2009, revenue included $1,178 for the additional $1.55 per diem in other accommodation funding which was introduced in that quarter retroactive to April 1, 2009.

A discussion of the quarter ended March 31, 2011 results compared to the same periods in the prior year is provided under the section "Selected Consolidated Financial and Operating Information".

Notes:
(1) The Quarter Ended March 31, 2010 presentation is the total of LSCLP results of operations pre-initial public offering for the period from January 1, 2010 to March 22, 2010 added to the results of the Company for the post-initial public offering period of March 23, 2010 to March 31, 2010.

Revenue

During the quarter ended March 31, 2011, Leisureworld generated revenue of $67,740 compared to $65,152 in 2009. This increase of $2,588 or 4.0% was largely due to a 2.9% increase in government funding rates which led to an increase in revenue of $1,572. Increases in special initiative funding totalling $1,586 were partly offset by a reduction of $750 related to the timing of revenue recognition to match spending under the flow-through envelopes and a $29 reduction in preferred accommodation revenues. PHCS's external revenue increased by $150, primarily attributable to an increase in personal support contract volumes.

Operating expenses

Operating expenses for the quarter ended March 31, 2011 were $57,634, which was $2,228 or 4.0% higher than the same quarter in the previous year. The increase was primarily attributable to increases in government funding including special initiative funding which led to associated increases in operating costs funded by the flow-through envelopes of $1,604. Property administration expenses increased by $307, primarily due to a $264 increase in utility expenses and property maintenance costs increased by $74. In addition, dietary service costs increased by $279 following the implementation of increased regulatory requirements and associated funding.

These increases were partly offset by a reduction in laundry service costs of $145. The increases in operating expenses included the impact of HST, which became effective on July 1, 2010. During the quarter ended March 31, 2011, PHCS's expenses increased by $78, primarily due to the increase in personal support contract volumes.

General and administrative expenses
General and administrative expenses for the quarter ended March 31, 2011 were $3,192, which was an increase of $307 from the quarter ended March 31, 2010. The increase was primarily due to acquisition related costs of $449 in the current quarter. Partly offsetting this increase was lower legal and consulting expenses of $115 compared to the corresponding quarter in the prior year.

Amortization
For the quarter ended March 31, 2011, amortization increased by $2,517, or 49.9% to $7,562. The increase was attributable to higher amortization of resident relationships of $2,521 and service contracts of $232. The main components of the amortization charge relate to resident relationships, $3,273, property and equipment, $4,001, and PHCS service contracts $257.

Financial expenses
For the quarter ended March 31, 2011, net interest expense totalled $3,462, which was a $44 reduction from the quarter ended March 31, 2010. The decrease was primarily due to reduced interest expense of $568 associated with the repayment of the Term Loan following the IPO, partly offset by higher non-cash interest of $424 on the Series A Senior Secured Notes ("2015 Notes") and lower interest income attributable to construction funding of $128.

Income taxes
Current income taxes have been calculated at the combined corporate tax rate of 28.25% based on taxable income for the quarter. The current income tax provision for the quarter ended March 31, 2011 is $452 which is an increase of $366 compared to the prior corresponding quarter which was only subject to income taxes for nine days following the IPO. A deferred income tax recovery of $1,654 in the quarter compared to $217 for the quarter ended March 31, 2010. The recovery is primarily related to the reversal of temporary differences during the quarter at the effective rate of 28.25%.

Net loss
For the quarter ended March 31, 2011, the net loss was $2,864 compared to $1,473 for the comparable quarter in the prior year. The increase in net loss of $1,391 was primarily the result of an increase in amortization of $2,517 being partly offset by a reduction in income taxes of $1,437.

Liquidity and capital resources
Leisureworld reported a cash balance of $16,299 as at March 31, 2011. The changes in cash for the quarter ended December 31, 2010 and period from March 23, 2010 to December 31, 2010 are as follows:

	Quarter Ended, March 31, 2011	From Incorporation, February 10, 2010, to March 31, 2010
Cash flow from operations before non-cash working capital items	**6,587**	781
Non-cash changes in working capital	**(2,262)**	(6,844)
Cash provided by (used in):		
Operating activities	**4,325**	(6,063)
Investing activities	**1,689**	(98,147)
Financing activities	**(4,333)**	117,385
Increase in cash	**1,681**	13,175

Operating activities
For the quarter ended March 31, 2011, cash flow from operations before non-cash changes in working capital totalled $6,587, compared to $781 in the period from February 10, 2010 to March 31, 2010. The $5,806 increase is primarily attributable to the period ended March 31, 2010 only including nine days of activity following the IPO. During the quarter ended March 31, 2011, non-cash changes in working capital used $2,262 of operating cash, compared to a usage of $6,844 in the period ended March 31, 2010. During the current quarter the use of cash was attributable to a decrease in income taxes payable of $2,113 driven by the payment of the prior year tax balance, as well as a reduction in accounts payable and accrued liabilities of $1,870 due to lower trade payables of $1,311 and a reduction in payroll related accruals of $914, partly offset by an increase in property tax accruals of $349. There was an increase in prepaid expenses and accounts receivable of $756, and $227, respectively. The increase in prepaid expenses is attributable to the timing of annual insurance renewals and other similar charges. This was partly offset by an increase in the net government funding liability of $2,704 primarily due to the timing of expenditures related to the flow-through envelopes.

For the period ended March 31, 2010, non-cash changes to working capital utilized $6,844 of operating cash. Accounts receivable and other assets decreased by $414, mainly due to a reduction in resident receivables and prepaid expenses reduced by $35. Income taxes payable increased by $86 and accounts payable and accrued liabilities decreased by $2,874 including a reduction in wage accruals of $1,907. The net government funding payable decreased by $4,495, primarily due to the recognition of the nine days of revenue that was deferred at March 22, 2010.

Investing activities
For the quarter ended March 31, 2011, capital expenditures totalled $465, principally related to building improvements, computer hardware and Human Resource Information System ("HRIS") project costs. During the quarter, Leisureworld received $2,133 in construction funding from MOHLTC.

For the period from March 23, 2010 to March 31, 2010, capital expenditures totalled $69 and $98,078 was paid for the acquisition of Leisureworld Senior Care LP.

Financing activities
During the quarter ended March 31, 2011, dividend payments were $4,271 and a net settlement payment of $62 was paid on the interest rate swap contract.

During the period ended March 31, 2010, financing activities provided cash of $117,385. The issuance of common shares on the IPO generated $179,264. Following receipt of the proceeds, Leisureworld repaid the $60,000 term loan and settled a related interest rate swap contract for $1,879.

Capital resources

Leisureworld's debt as at March 31, 2011 was $299,014 compared to $298,496 as at December 31, 2010. The increase of $518 includes $452 for the accretion of the fair value increment from the purchase price allocation. As at March 31, 2011, Leisureworld had a committed, but unutilized, revolving credit facility of $10,000 with a Canadian chartered bank.

Capital commitments

Leisureworld monitors all of its properties to assess its capital requirements. As part of the monitoring exercise, items are assessed and prioritized based on the urgency and necessity of the expenditure. As at March 31, 2011, total capital commitments outstanding were $743 relating to the purchase of software.

On June 22, 2010, the Company announced an agreement to acquire 88 LTC licences from Christie Gardens Apartments and Care Inc., conditional on approval by the MOHLTC. These licences are in the Toronto area and will increase the total number of the Company's LTC beds by approximately 2%. According to the terms of the agreement the licences will be acquired by March 31, 2013 at a cost of $2,200.

Leisureworld expects to meet its operating cash requirements through 2011, including required working capital investments, capital expenditures, and currently scheduled interest payments on debt, from cash on hand, cash flow from operations and its committed borrowing capacity.

Contractual obligations and other commitments

On November 24, 2005, LSCLP issued 4.814% Series A Senior Secured Notes due November 24, 2015 which are collateralized by the assets of LSCLP and its subsidiary partnerships and guaranteed by the subsidiary partnerships.

The 2015 Notes may be redeemed in whole or in part at the option of the Company at any time, upon not less than 30 days' and not more than 60 days' notice to the holders of the 2015 Notes. The redemption price is the greater of: (i) the face amount of the 2015 Notes to be redeemed; and (ii) the price that will provide a yield to the remaining average life of such 2015 Notes equal to the Canada Yield Price plus 0.18%, in each case together with accrued and unpaid interest.

Interest on the 2015 Notes is payable semi-annually in arrears on May 24 and November 24 of each year. Interest expense on the 2015 Notes in the quarter ended March 31, 2011 was $4,198 (2010 - $3,774), which includes non-cash interest of $452 (2010 - $50).

Following the acquisition of LSCLP on March 23, 2010, Leisureworld used proceeds of its IPO to repay a $60,000 Term Loan and settle a related interest swap contract for $1,879.

Leisureworld has a revolving credit facility with a Canadian chartered bank, collateralized by the assets of LSCLP and its subsidiary partnerships and guaranteed by the subsidiary partnerships, which it can access for working capital purposes. On October 15, 2010, the Company entered into an amending agreement to extend the maturity of the revolving credit facility to October 14, 2011 and reduce the principal amount from $15,000 to $10,000. The facility bears interest on cash advances at 175 basis points ("bps") per annum over the floating bankers' acceptance ("BA") rate (30, 60, 90 days), at 75bps over prime rate and on letters of credit at 175bps per annum. As at March 31, 2011, the Company had $68 in a letter of credit outstanding. The amount had been issued to a municipality with respect to outstanding obligations of the Company related to the construction of an LTC home.

Leisureworld has a ten-year lease with respect to its corporate office, which expires on December 31, 2015. As well, there are various other equipment leases that expire over the next five years. Payments due for each of the next five years and thereafter, for the leases and the 2015 Notes are as follows:

	Operating Leases	Long-Term Debt	Licences Purchase Commitment	Total
2011	392	-	-	**392**
2012	440	-	-	**440**
2013	403	-	2,200	**2,603**
2014	350	-	-	**350**
2015	348	310,000	-	**310,348**
Thereafter	-	-	-	**-**
	1,933	**310,000**	**2,200**	**314,133**

Acquisition
On April 27, 2011, the Company's subsidiary, The Royale LP ("Royale"), completed the acquisition of two retirement residences comprising 294 suites, for a net purchase price of $89,000 after working capital adjustments and a holdback of $5,500 to be held in escrow as an income guarantee to complement cash flow from the properties during the lease-up period.

Royale is a limited partnership that was formed under the laws of the Province of Ontario on March 17, 2011. The sole general partner of Royale is The Royale GP Corporation ("Royale GP"), a corporation incorporated under the laws of the Province of Ontario on March 16, 2011. The Company holds all of the issued and outstanding shares of Royale GP and the limited partnership interest in Royale.

To partly finance the purchase price, the Company entered into a two-year Bridge Loan with a Canadian chartered bank in the amount of $55,000. The Bridge Loan is secured by the assets of Royale and guaranteed by the Company and is subject to certain customary financial and non-financial covenants. The Company entered into an interest rate swap contract to substantially fix the interest rate payable on the Bridge Loan at 4.045%. The balance of the purchase price was funded from the net proceeds of a public offering of subscription receipts, completed on April 27, 2011, which raised gross proceeds of approximately $46,000. On closing of the acquisition, one common share was automatically issued in exchange for each outstanding subscription receipt, resulting in the issuance of 4,381,500 common shares.

Related party transactions
For the quarter ended March 31, 2011, Leisureworld earned revenue from Spencer House Inc., a charitable organization that owns a licence to operate an LTC home in Orillia, Ontario. A subsidiary of LSCLP has been contracted to manage the operations of Spencer House Inc. Total revenue for the quarter ended March 31, 2011 and period from March 23, 2010 to March 31, 2010 was $473 and $40, respectively. Included in accounts receivable was $221 owed by Spencer House Inc. at March 31, 2011 (March 31, 2010 - $53). These transactions are in the normal course of operations and have been valued in these consolidated financial statements at the exchange amount, which is the amount of consideration established and agreed to by the management of the related parties.

Significant judgments and estimates
The preparation of consolidated financial statements under IFRS requires the Company to make estimates and assumptions that affect the application of policies and reported amounts. Estimates and judgments are continually evaluated and are based on historical experience and other factors including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and assumptions which have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities are discussed below.

Property and equipment

(i) Fair value
On March 23, 2010, the Company indirectly purchased Leisureworld Senior Care LP. As part of this transaction, the property and equipment was recorded at fair value based on similar transactions for similar assets. The total fair value attributed to the property and equipment was $299,639.

(ii) Estimated useful lives
Management estimates the useful lives of property and equipment based on the period during which the assets are expected to be available for use. The amounts and timing of recorded expenses for amortization of property and equipment for any period are affected by these estimated useful lives. The estimates are reviewed at least annually and are updated if expectations change as a result of technical or commercial obsolescence and legal or other limits to use. It is possible that changes in these factors may cause significant changes in the estimated useful lives of the Company's property and equipment in the future.

Intangible assets

(i) Fair value
On March 23, 2010, the Company indirectly purchased Leisureworld Senior Care LP. As part of this transaction, the intangible assets were recorded at fair value based on similar transactions for similar assets. The total fair value attributed to the intangible assets was $106,466.

(ii) Estimated useful lives of finite lived intangible assets
Management estimates the useful lives of finite lived intangible assets based on the period during which the assets are expected to be available for use. The amounts and timing of recorded expenses for amortization of intangible assets for any period are affected by these estimated useful lives. The estimates are reviewed at least annually and are updated if expectations change as a result of physical wear and tear, technical or commercial obsolescence and legal or other limits to use. It is possible that changes in these factors may cause significant changes in the estimated useful lives of the Company's intangible assets in the future.

(iii) Infinite lived intangible assets
Ontario's Long-Term Care Homes Act, 2007 ("LTCHA") was proclaimed into law and became effective July 1, 2010. The LTCHA contains a new licence term regime which will result in licence terms for the Leisureworld homes ranging from 15 years for Class B and C homes to a minimum of 20 years for Class A homes. Previously, Ontario LTC licences were renewed annually by MOHLTC. Under LTCHA, ultimate control of LTC licences in Ontario remains with MOHLTC including approval of new licences, and transfer or revocation of existing licences. With an existing wait-list of 24,000 in Ontario and the demand for LTC beds projected to increase, management are of the view that licences will continue to have indefinite lives and will not be amortized.

Goodwill and indefinite lived intangible asset impairment analysis
On an annual basis in the second quarter, the Company uses forecast cash flow information and estimates of future growth to initially value other intangible assets, to assess whether goodwill and other intangible assets

are impaired. If the results of operations in a future period are adverse to the estimates used for impairment testing, an impairment charge may be triggered at that point, or a reduction in useful economic life may be required. A summary of the significant assumptions used in goodwill impairment analysis are presented in the Notes to the Interim Consolidated Financial Statements.

Share-based payments
The assumptions used in calculating the fair value of share-based payments have a significant impact upon magnitude of the charge recognized in the consolidated statement of operations. Details of the principal assumptions used in calculating the share-based payments expense are given in the Notes to the Interim Consolidated Financial Statements. When a grant of share awards is made, management reviews the estimates and assumptions used, and updates them accordingly.

Deferred tax
Deferred tax assets and liabilities require management's judgment in determining the amounts to be recognized. In particular, judgment is used when assessing the extent to which deferred tax assets should be recognized with consideration to the timing and level of future taxable income.

Income tax
The actual tax on the results for the interim period is determined according to complex tax laws and regulations. Where the effect of these laws and regulations is unclear, estimates are used in determining the liability for tax to be paid on past profits which are recognized in the consolidated financial statements. The Company considers the estimates, assumptions and judgments to be reasonable but this can involve complex issues which may take a number of years to resolve. The final determination of prior year tax liabilities could be different from the estimates reflected in the consolidated financial statements.

Capital disclosure
The Company defines its capital as its long-term debt, shareholders' equity and cash and cash equivalents.

The Company's objectives when managing capital are to: (i) maintain a capital structure that provides financing options to the Company when a financing or a refinancing need arises to ensure access to capital on commercially reasonable terms without exceeding its debt capacity; (ii) maintain financial flexibility in order to preserve its ability to meet financial obligations, including debt servicing payments and dividend payments; and (iii) deploy capital to provide an appropriate investment return to its shareholders.

The Company's financial strategy is designed to maintain a flexible capital structure consistent with the objectives stated above and to respond to changes in economic conditions. In order to maintain or adjust its capital structure, the Company may issue additional shares, issue additional debt, issue debt to replace existing debt with similar or different characteristics, and adjust the amount of dividends paid to the Company's shareholders. The Company's financing and refinancing decisions are made on a specific transaction basis and depend on such things as the Company's needs and market and economic conditions at the time of the transaction.

The Board of Directors reviews the level of monthly dividends paid on a quarterly basis. The long-term debt is collateralized by the assets of LSCLP and the subsidiary partnerships and guaranteed by the subsidiary partnerships. Under the Master Trust Indenture, LSCLP is subject to certain financial and non-financial covenants including a debt service coverage ratio defined as income from operations and construction funding (''EBITDA'') to debt service. The Company is in compliance with all financial covenants on its borrowings. However, there can be no assurance that future covenant requirements will be met. If the Company does not remain in compliance, its ability to amend the covenants or refinance its debt can be affected.

There were no changes in the Company's approach to capital management during the period.

Financial instruments

Financial instruments consist of cash and cash equivalents, accounts receivable and other assets, construction funding receivable, government funding receivable, annuity, accounts payable and accrued liabilities, government funding payable, long-term debt, and interest rate swap contract.

Cash and cash equivalents

Cash includes deposits held with Canadian chartered banks. Cash equivalents are short-term investments with an initial maturity of less than three months. Cash and cash equivalents are classified as held-for-trading. The carrying value of cash and cash equivalents approximates fair value as it is immediately available for use.

Accounts receivable and other assets

Accounts receivable and other assets are classified as loans and receivables. Accounts receivable and other assets are initially recorded at fair value and subsequently recognized at amortized cost. The carrying value of accounts receivable, after consideration of the provision for doubtful accounts, approximates their fair value due to the short-term maturity of these instruments.

Construction funding receivable

The construction funding receivable is classified as loans and receivables. The construction funding receivable is initially recorded at fair value and subsequently measured at amortized cost using the effective interest method. The fair value will differ from the carrying value due to changes in interest rates.

Annuity

The annuity is classified as loans and receivables. The annuity is initially recorded at fair value and subsequently measured at amortized cost using the effective interest method. The fair value will differ from the carrying value due to changes in interest rates.

Accounts payable and accrued liabilities

Accounts payable and accrued liabilities are classified as other liabilities. Accounts payable and accrued liabilities are initially recorded at fair value and subsequently measured at amortized cost, which approximates fair value due to the short-term maturity of the instruments.

Long-term debt

The Company's long-term debt is initially recorded at fair value and subsequently measured at amortized cost using the effective interest method and is classified as other liabilities. The fair value of the Company's long-term debt is subject to changes in interest rates and the Company's credit rating.

Government funding receivable/payable

The government funding balances are classified as either other liabilities or loans and receivables and are measured at amortized cost. Government funding receivable/payable represents the difference between the amounts approved and those received from the MOHLTC and are non-interest bearing. The carrying value of the government funding approximates its fair value due to the short-term maturity of the instrument for the current portion. The difference between the carrying value and the fair value of the long-term portion is insignificant.

Interest rate swap contract

The Company has an interest rate swap contract that does not qualify for hedge accounting. The changes in fair value are recorded through the consolidated statement of operations.

Fair value of financial instruments
The fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. When independent prices are not available, fair values are determined using valuation techniques that refer to observable market data. These techniques include comparisons with similar instruments where market observable prices exist, discounted cash flow analysis, and other valuation techniques commonly used by market participants. Fair values of long-term debt and construction funding receivable are calculated by discounted cash flow analysis based on current market rates for loans and investments with similar terms, conditions and maturities.

Nature and extent of risks arising from financial instruments
The following discussion is limited to the nature and extent of risks arising from financial instruments. The Company's normal operating, investing and financing activities expose it to a variety of financial risks including interest rate risk, credit risk and liquidity risk. Leisureworld is not exposed to foreign currency risk as all operations are in Canada and all purchases are contracted in Canadian dollars. The Company does not have significant exposure to price risk as most of its revenues are regulated by the MOHLTC. The Company's overall risk management process is designed to identify, manage and mitigate business risk, which includes financial risk.

Interest rate risk
Interest rate risk arises as the fair value of future cash flows from a financial instrument can fluctuate because of changes in market interest rates. Leisureworld is exposed to interest rate risk arising from fluctuations in interest rates in connection with its interest rate swap contract. This interest rate swap contract was purchased as part of the LSCLP acquisition and related to a hedge on anticipated borrowings for a transaction that did not occur. Interest rates, maturities and security affecting the interest and credit risk of Leisureworld's financial assets and liabilities have been disclosed in the Notes to the Interim Consolidated Financial Statements.

Credit risk
Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents, accounts receivable and other assets, construction funding receivable, government funding receivable and interest rate swap contract. The Company is exposed to credit risk from its residents and customers. However, the Company has a significant number of residents and customers, which minimizes concentration of credit risk. The credit risk related to amounts owed by the residents is further mitigated by the Company's ability to recover 50% of LTC amounts written off from the MOHLTC. A provision for management's estimate of uncollectible accounts receivable is established when there is objective evidence the Company will not be able to collect all amounts due. The Company assesses collectability of specific accounts receivable and also assesses the requirement for a provision based on historical experience. When a receivable is uncollectible, it is written off against the allowance for doubtful accounts. Subsequent recoveries of amounts previously written off are credited against operating expenses in the consolidated statement of operations.

The Company is exposed to credit risk through the amounts receivable from the MOHLTC. The Company has assessed the credit risk associated with the amounts owed by the MOHLTC as low as they are receivable from the Ontario government. Management has assessed the credit risks associated with the interest rate swap contract and cash and cash equivalent balances as low given the counter parties are major financial institutions that have been accorded investment grade ratings by a primary rating agency.

Liquidity risk
Liquidity risk is the risk the Company may encounter difficulties in meeting obligations associated with financial liabilities and commitments. The Company has a credit agreement in place related to the long-term debt. This credit agreement contains a number of standard financial and other covenants. A failure by the

Company to comply with the obligations in this credit agreement could result in a default, which, if not rectified or waived, could permit acceleration of the relevant indebtedness.

There can be no assurance the Company could generate sufficient cash flow from operations to pay outstanding indebtedness, fund any other liquidity needs, refinance this credit facility, or obtain additional financing on commercially reasonable terms, if at all.

The Company's credit facility is, and future borrowings may be, at variable rates of interest, which exposes the Company to the risk of increased interest rates.

The Company maintains a capital structure, which helps to manage the risk of default under these credit agreements.

Transaction costs

Transaction costs are incremental costs directly related to the acquisition of a financial asset or the issuance of a financial liability or equity. The Company incurs transaction costs primarily through the issuance of debt or shares, and classifies these costs with the related debt, or as a reduction of the value of the proceeds received for the share issuance. The costs associated with the issuance of debt are amortized into interest expense using the effective interest rate method over the life of the related debt instrument. Incremental costs directly attributable to the issuance of shares are recognized as a reduction of common shares. Transaction costs associated with acquisitions are expensed as incurred.

Risks and uncertainties

Please refer to Risk Factors in the Company's Annual Report for the year ended December 31, 2010 and those related to the acquisition in the Company's short form prospectus dated April 14, 2011 which are available on SEDAR at www.sedar.com. Management is of the opinion that there have been no significant changes in risks and uncertainties since the aforementioned documents were approved by the Board of Directors of Leisureworld.

Outlook

A key focus for management will be integrating the two retirement residences acquired on April 27, 2011. This transaction broadens Leisureworld's product and service offering along the continuum of care and expands the Company's business into one of the fastest growing segments of the seniors living market.

During 2011, Leisureworld will continue to focus on enhancing the quality of care and accommodation for residents. Leisureworld expects to benefit from excellent industry fundamentals and maintain full occupancy in its LTC portfolio which serves as a reliable platform for shareholder dividends and disciplined long-term growth. Leisureworld expects to pay a monthly dividend of $0.85 per common share in 2011.

Leisureworld is well positioned to capitalize on acquisition opportunities across the entire spectrum of senior care and to execute its strategy to deliver high quality care and accommodation to seniors.

1 Organization

Leisureworld Senior Care Corporation ("Leisureworld" or the "Company") was incorporated under the laws of the Province of Ontario on February 10, 2010 and was continued under the laws of the Province of British Columbia on March 18, 2010. The Company closed its Initial Public Offering ("IPO") on March 23, 2010 and acquired, indirectly, all of the outstanding limited partnership interests in Leisureworld Senior Care LP ("LSCLP") and common shares of Leisureworld Senior Care GP Inc., the general partner of LSCLP.

Leisureworld and its predecessors have been operating since 1972. Leisureworld owns and operates 26 long-term care ("LTC") homes (representing an aggregate of 4,314 beds), all of which are located in the Province of Ontario. Leisureworld's head office is located at 302 Town Centre Blvd., Markham, Ontario. Leisureworld also owns and operates one Retirement Residence ("RR") (representing 29 suites) and one Independent Living ("IL") residence (representing 53 apartments) in the Province of Ontario. Ancillary businesses of the Company include Preferred Health Care Services ("PHCS"), an accredited provider of professional nursing and personal support services for both community based home healthcare and LTC homes.

2 Basis of preparation and adoption of IFRS

The Company prepares its financial statements in accordance with Canadian generally accepted accounting principles ("GAAP") as set out in the Handbook of The Canadian Institute of Chartered Accountants ("CICA Handbook"). In 2010, the CICA Handbook was revised to incorporate International Financial Reporting Standards ("IFRS"), and requires publicly accountable enterprises to apply such standards effective for years beginning on or after January 1, 2011. Accordingly, the Company has commenced reporting on this basis in these interim consolidated financial statements. In the financial statements, the term "Canadian GAAP" refers to Canadian GAAP before the adoption of IFRS.

These interim consolidated financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34 and IFRS 1. As at February 10, 2010, the date of incorporation and transition to IFRS, the Company's balance sheet only included share capital and cash of $10.00. As a result, a transitional balance sheet has not been presented as it provides no meaningful information to the users of the financial statements. The Company has consistently applied the same accounting policies throughout all periods presented, as if these policies had always been in effect. Note 4 discloses the impact of the transition to IFRS on the Company's reported balance sheets, statements of operations and comprehensive loss and cash flows, including the nature and effect of significant changes in accounting policies from those used in the Company's consolidated financial statements for the period ended December 31, 2010.

The policies applied in these interim consolidated financial statements are based on IFRS issued and outstanding as of May 10, 2011, the date the Board of Directors approved the statements. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending December 31, 2011 could result in restatement of these interim consolidated financial statements, including the transition adjustments recognized on change-over to IFRS.

The interim consolidated financial statements should be read in conjunction with the Company's Canadian GAAP annual consolidated financial statements for the year ended December 31, 2010. Note 4 discloses IFRS information for the period ended December 31, 2010 that was not provided in the 2010 annual consolidated financial statements.

3 Summary of significant accounting policies, judgements and estimation uncertainty

Basis of preparation

The preparation of interim consolidated financial statements in conformity with adopted IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the interim consolidated financial statements are disclosed below under the heading "Significant judgements and estimates".

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The accounting policies set out below and on the following pages have been applied consistently to all periods presented in the financial statements. The accounting policies have been applied consistently by Company's subsidiaries.

Basis of consolidation

The interim consolidated financial statements comprise the financial statements of Leisureworld Senior Care Corporation and its subsidiaries. The financial statements of the subsidiaries are prepared for the same reporting periods as the parent company, using consistent accounting policies.

Subsidiaries are 100% owned and fully controlled by the Company. Subsidiaries are consolidated in these financial statements from the date of acquisition and continue to be consolidated until the date of disposal.

All intercompany balances, transactions and unrealized gains and losses arising from intercompany transactions, are eliminated on consolidation.

Revenue recognition

Consolidated revenues include revenues generated from the operation of LTC homes, retirement residences and independent living facilities, PHCS and management fees associated with the operation of Spencer House Inc. A significant portion of the revenues are funded by the Ministry of Health and Long-Term Care ("MOHLTC"). Revenue is recognized in the period for which the services are rendered.

Long-term care revenue

Ontario's LTC sector is regulated by the MOHLTC which provides government funding to LTC homes. Operational funding, paid monthly, is divided into three envelopes: nursing; programs; and other accommodations which include funding for raw food. Revenue for nursing, programs and food is only recognized to the extent that it has been incurred. All revenue received that is not spent is deferred. Only the non-food portion of the other accommodation funding is recognized at the time of receipt. Approximately 70% of revenue from Leisureworld's LTC homes is received from the MOHLTC. Leisureworld also receives structural compliance premiums from the MOHLTC on a per resident per day basis. Additionally, the MOHLTC provides funding to LTC homes that have been accredited by Accreditation Canada and reimburses up to 85% of property tax costs.

Revenue for accommodation fees is recognized based on the number of resident days in the period multiplied by the per diem amounts legislated by the MOHLTC. Revenue for each LTC facility is recognized based on full occupancy, unless there is an indication that the annualized occupancy rate will fall below the 97% level. If occupancy is below 97%, then revenue is recognized based on actual occupancy data. Revenue from ancillary services is recognized when the services are rendered. Other LTC revenues paid by the residents relating to accommodation fees and ancillary services are recognized in the period in which the services were rendered. The Company also receives government funding for various other operational items, including funding for property taxes, pay equity and accreditation, which is recognized when such costs are incurred.

Retirement residence and independent living revenue
Residents pay accommodation rates on a monthly basis and revenue is recorded when the service is rendered.

PHCS revenue
Revenue associated with PHCS is recognized when the services are rendered. Revenue generated from providing services to other operating segments of the Company is eliminated on consolidation.

Spencer House Inc. revenue
Spencer House Inc. is a charitable organization that owns a licence to operate an LTC home in Orillia, Ontario. A subsidiary of the Company owns the property where the home is operated and has been contracted to manage the operations of Spencer House Inc. The Company earns rental income from leasing the property to Spencer House Inc. as well as a management fee based on a percentage of gross revenues of the operation for managing the facility. Revenue is recognized when the services are rendered.

Construction funding
The MOHLTC provides funding to new homes constructed after April 1, 1998. Under the development agreements, these new homes receive a 20-year commitment from the MOHLTC to provide per diem funding of up to $10.35 per bed, depending on actual construction costs. The construction funding receivable is measured at amortized cost using the effective interest method. The fair value will differ from the carrying value due to changes in interest rates.

Property and equipment
Property and equipment are recorded at cost less accumulated amortization and accumulated impairment losses. Costs include expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost can be measured reliably. The carrying amount of a replaced asset is derecognized when replaced. Repairs and maintenance costs are charged to the consolidated statement of operations and comprehensive loss during the period in which they are incurred.

The Company provides for amortization at rates designed to amortize the cost of the property and equipment over their estimated useful lives. The annual amortization rates and methods are as follows:

Land	Not amortized
Buildings	Up to 50 years straight-line
Furniture and fixtures	10 years straight-line
Computer hardware	5 years straight-line
Circulating equipment	Not amortized

Circulating equipment is comprised of china, linen, glassware and silverware in circulation, which is valued at cost. The cost of acquiring a basic inventory of these items is capitalized and any replacements incurred thereafter are expensed.

The Company allocates the amount initially recognized in respect of an item or property and equipment to its significant parts and depreciates separately each such part. Residual values, method of amortization and useful lives of the assets are reviewed annually and adjusted if appropriate. Gains and losses on disposals of property and equipment are determined by comparing the proceeds with the carrying amount of the asset and are included as part of other gains and losses in the consolidated statement of operations and comprehensive loss.

Intangible assets
Intangible assets include bed licences, service contracts, resident relationships and computer software that is not integral to property and equipment. Intangible assets with finite useful lives are amortized over their respective estimated useful lives and reviewed for impairment at each consolidated balance sheet date. The useful lives are as follows:

Licences	Not amortized
Service contracts	3 years straight-line
Resident relationships	2 years straight-line
Computer software	5 years straight-line

Ontario's Long-Term Care Homes Act, 2007 ("LTCHA"), was proclaimed into law and became effective July 1, 2010. The LTCHA contains a new licence term regime which will result in licence terms for the Leisureworld homes ranging from 15 years for Class B and C homes to a minimum of 20 years for Class A homes. Previously, Ontario LTC licences were renewed annually by the MOHLTC. Under the LTCHA, ultimate control of LTC licences in Ontario remains with the MOHLTC including approval of new licences, and transfer or revocation of existing licences. With an existing wait-list of 24,000 in Ontario and the demand for LTC beds projected to increase, management is of the view that licences will continue to have indefinite lives and will not be amortized.

The Company incurs costs associated with the design of a new Human Resource Information System ("HRIS"); such costs are classified as computer software. Expenditures incurred during the research phase are expensed as incurred. Expenditures during the development phase are capitalized if certain criteria, including technical feasibility and intent and ability to develop and use the technology, are met; otherwise, they are expensed as incurred. HRIS will be amortized over its useful life of five years once put into service.

Goodwill
All business combinations are accounted for by applying the purchase method. Goodwill represents amounts arising on the acquisition of subsidiaries, which is the excess of the purchase consideration and associated costs over the fair values attributable to the net identifiable assets acquired.

Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Goodwill is not amortized and impairment losses are not reversed. Goodwill is allocated to cash-generating units ("CGUs") for the purpose of assessing impairment. The allocation is made to the CGU, or group of CGUs, that are expected to benefit from the acquisition.

Impairment of non-financial assets

The Company reviews the carrying amounts of its property and equipment and finite lived intangible assets annually in the second quarter of each year to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. For assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows. An intangible asset with an indefinite useful life is tested for impairment annually and whenever there is an indication that the asset may be impaired. Non-financial assets, other than goodwill, that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Financial instruments

Financial instruments comprise cash and cash equivalents, accounts receivable and other assets, construction funding receivable, government funding receivable/payable, accounts payable and accrued liabilities, long-term debt and interest rate swap contract. Financial instruments are recognized initially at fair value. The Company's interest rate swap contract is measured at fair value through its consolidated statement of operations and comprehensive loss.

Derivatives

Derivative instruments are used to reduce interest rate risk on the Company's debt. The Company does not enter into derivative instruments for trading or speculative purposes. Derivatives are carried at fair value and are reported as assets where they have a positive fair value and as liabilities where they have a negative fair value. IFRS specifies the criteria that must be satisfied in order for hedge accounting to be applied and the accounting for each of the permitted hedging strategies: fair value hedges and cash flow hedges. Hedge accounting is discontinued prospectively when the derivative no longer qualifies as an effective hedge, or the derivative is terminated or sold, or upon the sale or early termination of the hedged item. The change in fair value of an instrument that is determined to be an effective hedge is recognized in other comprehensive income (loss). The ineffective portion of the change in fair value is recorded in the consolidated statement of operations and comprehensive loss. The Company has no derivative financial instruments qualifying for hedge accounting at the consolidated balance sheet date.

Derivatives embedded in other financial instruments or contracts are separated from their host contracts and accounted for at fair value when their economic characteristics and risks are not closely related to those of the host contract. The Company has determined that it does not have any outstanding contracts or financial instruments with embedded derivatives that require bifurcation.

Impairment of financial assets

Financial assets are reviewed at each consolidated balance sheet date to assess whether there is objective evidence that indicates an impairment of a financial asset. If such evidence exists, the Company recognizes an impairment loss measured at the excess of the carrying amount over the fair value of the asset, which is recorded in the consolidated statement of operations and comprehensive loss.

Transaction costs

Transaction costs are incremental costs directly related to the acquisition of a financial asset or the issuance of a financial liability or equity. The Company incurs transaction costs primarily through the issuance of debt or shares, and classifies these costs with the related debt, or as a reduction of the value of

the proceeds received for the share issuance. The costs associated with the issuance of debt are amortized into interest expense using the effective interest rate method over the life of the related debt instrument. Incremental costs directly attributable to the issuance of shares are recognized as a reduction of shares capital. Transaction costs associated with acquisitions are expensed as incurred.

Interest bearing loans and borrowings
All interest bearing loans and borrowings are initially recognized at the fair value of the consideration received less directly attributable transaction costs. After initial recognition, interest bearing loans and borrowings are subsequently measured at their amortized cost using the effective interest method.

Provisions
Provisions are recognized when the Company has a present obligation as a result of a past event and it is more likely than not that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of this obligation. Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the end of the reporting period, and are discounted to present value where the effects are material. The Company performs evaluations to identify onerous contracts and, where applicable, records provisions for such contracts.

Operating lease payments
Payments made under operating leases are recognized in the consolidated statement of operations and comprehensive loss on a straight-line basis over the term of the lease.

Share capital
Common shares are classified as equity. Incremental costs directly attributable to the issuance of shares are recognized as a deduction from equity.

Dividends
Dividends on common shares are recognized in the consolidated financial statements in the period in which the approved dividends are declared by the Board of Directors of the Company.

Earnings (loss) per share
Basic earnings (loss) per share ("EPS") is calculated by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period.

Diluted EPS is calculated by adjusting the weighted average number of common shares outstanding for dilutive instruments. The number of shares included with respect to options, warrants and similar instruments is computed using the treasury stock method. The Company's potentially dilutive common shares comprise unvested shares issued to certain senior executives and are currently anti-dilutive.

Share-based payments
The Company issued shares to certain senior executives. These shares either vest over three years (33% per year) or vested immediately upon grant. Each tranche in an award is considered a separate award with its own vesting period and grant date fair value. Fair value of each tranche is measured at the date of grant using the Black-Scholes option pricing model. Compensation expense is recognized over each tranche's vesting period by increasing shareholders' equity based on the number of shares expected to vest.

Pension costs
Payments to defined contribution retirement benefit plans are charged as an expense as incurred.

Income taxes
The Company follows the asset and liability method of accounting for deferred income taxes. Income tax comprises current and deferred tax. Income tax is recognized in the consolidated statement of operations and comprehensive loss except to the extent that it relates to items recognized directly in equity, in which case the income tax is also recognized directly in equity.

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

In general, deferred tax is recognized in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the consolidated balance sheet date and are expected to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent it is probable that the assets can be recovered.

Deferred income tax assets and liabilities are presented as non-current.

The carrying amount of deferred tax assets is reviewed at each consolidated balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities. This applies when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Segmented reporting
The Company operates solely within Canada; hence no geographical segment disclosures are presented. Segmented information is presented in respect of business segments, based upon management's internal reporting structure. Further details are provided in Note 26 to these interim consolidated financial statements.

Accounting standards issued but not yet applied

International Financial Reporting Standard 9, Financial Instruments ("IFRS 9")
IFRS 9 was issued in November 2009 and contained requirements for financial assets. This standard addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39, Financial Instruments – Recognition and Measurement, for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments, and such instruments are either recognized at fair value through profit or loss or at fair value through other comprehensive income. Where such equity instruments are measured at fair value through other comprehensive income, dividends to the extent not clearly representing a return of investment, are recognized in profit or loss; however, other gains and losses (including impairments) associated with such instruments remain in accumulated other comprehensive income indefinitely.

Requirements for financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income.

IAS 39 is required to be applied for accounting periods beginning on or after January 1, 2013, with earlier adoption permitted. The Company has not yet assessed the impact of the standard or determined whether it will adopt the standard early.

Significant judgements and estimates

The preparation of consolidated financial statements under IFRS requires the Company to make estimates and assumptions that affect the application of policies and reported amounts. Estimates and judgements are continually evaluated and are based on historical experience and other factors including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and assumptions which have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities are discussed below.

Property and equipment

(iii) Fair value

On March 23, 2010, the Company indirectly purchased Leisureworld Senior Care LP. As part of this transaction, the property and equipment was recorded at fair value based on similar transactions for similar assets. The total fair value attributed to the property and equipment was $299,639.

(iv) Estimated useful lives

Management estimates the useful lives of property and equipment based on the period during which the assets are expected to be available for use. The amounts and timing of recorded expenses for amortization of property and equipment for any period are affected by these estimated useful lives. The estimates are reviewed at least annually and are updated if expectations change as a result of technical or commercial obsolescence and legal or other limits to use. It is possible that changes in these factors may cause significant changes in the estimated useful lives of the Company's property and equipment in the future.

Intangible assets

(iv) Fair value

On March 23, 2010, the Company indirectly purchased Leisureworld Senior Care LP. As part of this transaction, the intangible assets were recorded at fair value based on similar transactions for similar assets. The total fair value attributed to the intangible assets was $106,466.

(v) Estimated useful lives of finite lived intangible assets

Management estimates the useful lives of finite lived intangible assets based on the period during which the assets are expected to be available for use. The amounts and timing of recorded expenses for amortization of intangible assets for any period are affected by these estimated useful lives. The estimates are reviewed at least annually and are updated if expectations change as a result of physical wear and tear, technical or commercial obsolescence and legal or other limits to use. It is possible that changes in these factors may cause significant changes in the estimated useful lives of the Company's intangible assets in the future.

(vi) Indefinite lived intangible assets

The LTCHA was proclaimed into law and became effective July 1, 2010. The LTCHA contains a new licence term regime that will result in licence terms for the Leisureworld homes ranging from 15 years for Class B and C homes to a minimum of 20 years for Class A homes. Previously, Ontario LTC licences were renewed annually by MOHLTC. Under LTCHA, ultimate control of LTC licences in Ontario remains with MOHLTC, including approval of new licences and transfer or revocation of existing licences. With an existing wait-list of 24,000 in Ontario and the demand for LTC beds projected to increase, management is of the view that licences will continue to have indefinite lives and will not be amortized.

Goodwill and indefinite lived intangible asset impairment analysis

On an annual basis in the second quarter, the Company uses forecast cash flow information and estimates of future growth to assess whether goodwill and other intangible assets are impaired. If the results of operations in a future period are adverse to the estimates used for impairment testing, an impairment charge may be triggered at that point, or a reduction in useful economic life may be required. Any impairment losses are recognized in the consolidated statement of operations and comprehensive loss as an expense and impairment losses on goodwill are not reversible.

Share-based payments

The assumptions used in calculating the fair value of share-based payments have a significant impact upon the magnitude of the charge recognized in the consolidated statement of operations and comprehensive loss. Details of the principal assumptions used in calculating the share-based payments expense are given in Note 17. When a grant of share awards is made, management reviews the estimates and assumptions used and updates them accordingly.

Deferred tax

Deferred tax assets and liabilities require management's judgement in determining the amounts to be recognized. In particular, judgement is used when assessing the extent to which deferred tax assets should be recognized with consideration to the timing and level of future taxable income.

Income tax

The actual tax on the results for the interim period is determined according to complex tax laws and regulations. Where the effect of these laws and regulations is unclear, estimates are used in determining the liability for tax to be paid on past profits which are recognized in the consolidated financial statements. The Company considers the estimates, assumptions and judgements to be reasonable but this can involve complex issues which may take a number of years to resolve. The final determination of prior year tax liabilities could be different from the estimates reflected in the consolidated financial statements.

4 Transition to IFRS

The effect of the Company's transition to IFRS, described in Note 2, is summarized in this note as follows:

(a) Reconciliation of equity as previously reported under Canadian GAAP to IFRS

(b) Reconciliation of net loss as previously reported under Canadian GAAP to IFRS

It should be noted that since the Company was formed on February 10, 2010, the transition elections in accordance with IFRS are not applicable.

(a) Reconciliation of equity as previously reported under Canadian GAAP to IFRS

	Note	December 31, 2010	March 31, 2010
Equity as reported under Canadian GAAP		171,158	174,871
IFRS adjustments increase (decrease):			
Property and equipment	(i)	(4,226)	(130)
Acquisition related costs	(ii)	(35)	-
Deferred income tax	(iii)	1,294	57
		(2,967)	(73)
Equity as reported under IFRS		**168,191**	**174,798**

(i) Property and equipment
Under IFRS, the significant individual components of property and equipment with different useful lives are required to be separately identified and measured whereas management had not determined components under Canadian GAAP at the time of acquisition of the assets. The changes in property and equipment relate to differences in amortization of the property and equipment which were impacted by componentization.

(ii) Acquisition related costs
In accordance with Canadian GAAP, costs directly attributable to the acquisition are capitalized. Under IFRS, these costs are required to be expensed.

(iii) Deferred income tax
The change in shareholders' equity related to deferred income tax reflects the change in temporary differences resulting from the effect of the IFRS adjustments described.

(b) Reconciliation of net loss as previously reported under Canadian GAAP to IFRS

	Note	December 31, 2010	March 31, 2010
Net loss as reported under Canadian GAAP		(4,132)	(253)
IFRS adjustments increase (decrease):			
Property and equipment	(i)	(4,226)	(130)
Acquisition related costs	(ii)	(35)	-
Deferred income tax	(iii)	1,294	57
		(2,967)	(73)
Net loss as reported under IFRS		**(7,099)**	**(326)**

(i) Property and equipment
As described in 4(a)(i), the changes in property and equipment relate to differences in amortization of the property and equipment, which were impacted by componentization under IFRS.

(ii) Acquisition related costs
As described in 4(a)(ii), costs related to acquisitions are required to be expensed as incurred under IFRS.

(iii) Deferred income tax
Deferred income tax is impacted by the change in temporary differences resulting from the effect of the IFRS reconciling items described in 4(a)(i) and 4(a)(ii) above.

5 Financial instruments

Financial instruments consist of cash and cash equivalents, accounts receivable and other assets, construction funding receivable, government funding receivable, annuity, accounts payable and accrued liabilities, government funding payable, long-term debt, and interest rate swap contract.

Cash and cash equivalents
Cash includes deposits held with Canadian chartered banks. Cash equivalents are short-term investments with an initial maturity of less than three months. Cash and cash equivalents are classified as held-for-trading. The carrying value of cash and cash equivalents approximates fair value as it is immediately available for use.

Accounts receivable and other assets
Accounts receivable and other assets are classified as loans and receivables. Accounts receivable and other assets are initially recorded at fair value and subsequently recognized at amortized cost. The carrying value of accounts receivable, after consideration of the provision for doubtful accounts, approximates their fair value due to the short-term maturity of these instruments.

Construction funding receivable
The construction funding receivable is classified as loans and receivables. The construction funding receivable is initially recorded at fair value and subsequently measured at amortized cost using the effective interest method. The fair value will differ from the carrying value due to changes in interest rates.

Annuity
The annuity is classified as loans and receivables. The annuity is initially recorded at fair value and subsequently measured at amortized cost using the effective interest method. The fair value will differ from the carrying value due to changes in interest rates.

Accounts payable and accrued liabilities
Accounts payable and accrued liabilities are classified as other liabilities. Accounts payable and accrued liabilities are initially recorded at fair value and subsequently measured at amortized cost, which approximates fair value due to the short-term maturity of the instruments.

Long-term debt
The Company's long-term debt is initially recorded at fair value and subsequently measured at amortized cost using the effective interest method and is classified as other liabilities. The fair value of the Company's long-term debt is subject to changes in interest rates and the Company's credit rating.

Government funding receivable/payable
The government funding balances are classified as either other liabilities or loans and receivables and are measured at amortized cost. Government funding receivable/payable represents the difference between the amounts approved and those received from the MOHLTC which are non-interest bearing. The

carrying value of the government funding approximates its fair value due to its short-term maturity. The difference between the carrying value and the fair value of the long-term portion is insignificant.

Interest rate swap contract
The Company has an interest rate swap contract that does not qualify for hedge accounting. The changes in fair value are recorded through the consolidated statement of operations and comprehensive loss.

Fair value of financial instruments
The fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. When independent prices are not available, fair values are determined using valuation techniques that refer to observable market data. These techniques include comparisons with similar instruments where market observable prices exist, discounted cash flow analysis, and other valuation techniques commonly used by market participants. Fair values of long-term debt and construction funding receivable are calculated by discounted cash flow analysis based on current market rates for loans and investments with similar terms, conditions and maturities.

The following tables provide a summary of the carrying and fair values for each classification of financial instrument:

	Carrying value as at March 31, 2011				
	Assets / liabilities at fair value through the profit and loss	**Loans and receivables**	**Other liabilities**	**Total carrying value**	**Fair value**
Financial Assets:					
Cash and cash equivalents	**16,299**	**-**	**-**	**16,299**	**16,299**
Accounts receivable and other assets	**-**	**3,914**	**-**	**3,914**	**3,914**
Government funding receivable	**-**	**2,888**	**-**	**2,888**	**2,888**
Construction funding receivable	**-**	**79,230**	**-**	**79,230**	**79,704**
Financial Liabilities:					
Accounts payable and accrued liabilities	**-**	**-**	**34,788**	**34,788**	**34,788**
Government funding payable	**-**	**-**	**9,203**	**9,203**	**9,203**
Long-term debt	**-**	**-**	**299,014**	**299,014**	**315,410**
Interest rate swap contract	**164**	**-**	**-**	**164**	**164**

	Carrying value as at December 31, 2010				
	Assets / liabilities at fair value through the profit and loss	Loans and receivables	Other liabilities	Total carrying value	Fair value
Financial Assets:					
Cash and cash equivalents	14,618	-	-	14,618	14,618
Accounts receivable and other assets	-	3,687	-	3,687	3,687
Government funding receivable	-	2,800	-	2,800	2,800
Construction funding receivable	-	80,575	-	80,575	82,105
Financial Liabilities:					
Accounts payable and accrued liabilities	-	-	32,967	32,967	32,967
Government funding payable	-	-	6,411	6,411	6,411
Long-term debt	-	-	298,496	298,496	320,593
Interest rate swap contract	208	-	-	208	208

Impairment charges on accounts receivable are disclosed below. All interest income and expense from financial instruments has been disclosed in Note 12.

Maturities of financial instruments

The Company generally has no financial instruments maturing beyond one year with the exception of its long-term debt as described in Note 12, and the construction funding receivable. For the years ending December 31, 2011 through 2015, and thereafter, Leisureworld has estimated that the following undiscounted cash flows will arise from its interest rate swap contract, construction funding receivable and long-term debt based on valuations at the consolidated balance sheet date.

	As at March 31, 2011					
	2011	**2012**	**2013**	**2014**	**2015**	**Thereafter**
Interest rate swap contract						
Cash inflows	**118**	**-**	**-**	**-**	**-**	**-**
Cash outflows	**(284)**	**-**	**-**	**-**	**-**	**-**
	(166)	**-**	**-**	**-**	**-**	**-**
Construction funding receivable						
Cash inflows	**6,398**	**8,554**	**8,530**	**8,530**	**8,530**	**59,205**
Long-term debt						
Cash outflows	**(14,923)**	**(14,923)**	**(14,923)**	**(14,923)**	**(324,923)**	**-**
Net cash inflows (outflows)	**(8,691)**	**(6,369)**	**(6,393)**	**(6,393)**	**(316,393)**	**59,205**

	As at December 31, 2010					
	2011	2012	2013	2014	2015	Thereafter

Long-term debt						
Cash outflows	(14,923)	(14,923)	(14,923)	(14,923)	(324,923)	-
Net cash inflows (outflows)	(6,604)	(6,369)	(6,393)	(6,393)	(316,393)	59,205

Nature and extent of risks arising from financial instruments

The following discussion is limited to the nature and extent of risks arising from financial instruments. The Company’s normal operating, investing and financing activities expose it to a variety of financial risks including interest rate risk, credit risk and liquidity risk. Leisureworld is not exposed to foreign currency risk as all operations are in Canada and all purchases are contracted in Canadian dollars. The Company does not have significant exposure to price risk as most of its revenues are regulated by the MOHLTC. The Company’s overall risk management process is designed to identify, manage and mitigate business risk, which includes financial risk.

Interest rate risk

Interest rate risk arises as the fair value of future cash flows from a financial instrument can fluctuate because of changes in market interest rates. Leisureworld is exposed to interest rate risk arising from fluctuations in interest rates in connection with its interest rate swap contract. This interest rate swap contract was purchased as part of the LSCLP acquisition and related to a hedge on anticipated borrowings

for a transaction that did not occur. Interest rates, maturities and security affecting the interest and credit risk of Leisureworld's financial assets and liabilities have been disclosed in Notes 12 and 13.

Credit risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents, accounts receivable and other assets, construction funding receivable, government funding receivable and interest rate swap contract. The Company is exposed to credit risk from its residents and customers. However, the Company has a significant number of residents and customers, which minimizes concentration of credit risk. The credit risk related to amounts owed by the residents is further mitigated by the Company's ability to recover 50% of LTC amounts written off from the MOHLTC. A provision for management's estimate of uncollectible accounts receivable is established when there is objective evidence the Company will not be able to collect all amounts due. The Company assesses collectability of specific accounts receivable and also assesses the requirement for a provision based on historical experience. When a receivable is uncollectible, it is written off against the allowance for doubtful accounts. Subsequent recoveries of amounts previously written off are credited against operating expenses in the consolidated statement of operations and comprehensive loss.

The continuity of the allowance for doubtful accounts is as follows:

Balance, February 10, 2010	-
Acquired on Acquisition (Note 7)	869
Provision for receivables during the period	129
Receivables written off during the period	(234)
Balance, December 31, 2010	764
Provision for receivables during the quarter	(13)
Receivables written off during the quarter	(4)
Balance, March 31, 2011	**747**

The Company has $2,863 in trade and other receivables (December 31, 2010 - $2,492) that are past due but not impaired. These amounts have not been provided for as there has not been a significant change in the credit quality and the amounts are still considered recoverable. The Company does not hold any collateral over these balances. The aging analysis of these receivables is as follows:

	March 31, 2011	December 31, 2010
0 - 30 days	**1,708**	1,292
31 - 60 days	**388**	386
61 - 90 days	**101**	116
Over 90 days	**666**	698

The Company is exposed to credit risk through the amounts receivable from the MOHLTC. The Company has assessed the credit risk associated with the amounts owed by the MOHLTC as low as they are receivable from the Ontario government. Management has assessed the credit risks associated with the interest rate swap contract and cash and cash equivalent balances as low given the counter parties are major financial institutions that have been accorded investment grade ratings by a primary rating agency.

Liquidity risk

Liquidity risk is the risk the Company may encounter difficulties in meeting obligations associated with financial liabilities and commitments. The Company has a credit agreement in place related to the long-term debt. This credit agreement contains a number of standard financial and other covenants. A failure by the Company to comply with the obligations in this credit agreement could result in a default, which, if not rectified or waived, could permit acceleration of the relevant indebtedness.

There can be no assurance the Company could generate sufficient cash flow from operations to pay outstanding indebtedness, fund any other liquidity needs, refinance this credit facility, or obtain additional financing on commercially reasonable terms, if at all.

The Company's credit facility is, and future borrowings may be, at variable rates of interest, which exposes the Company to the risk of increased interest rates.

The Company maintains a capital structure, including access to a revolving credit facility of $10,000, which helps to manage the risk of default under these credit agreements.

Sensitivity analysis

IFRS requires disclosure of a sensitivity analysis that is intended to illustrate the sensitivity of the Company's financial position, performance and fair value of cash flows associated with the Company's financial instruments to changes in market variables (i.e. interest rates). The sensitivity analysis provided discloses the effect on profit or loss at March 31, 2011 assuming that a reasonably possible change in the relevant risk variable has occurred at March 31, 2011 and has been applied to the risk exposures in existence at that date to show the effects of reasonably possible changes. The reasonably possible changes in market variables used in the sensitivity analysis were determined based on implied volatilities where available or historical data.

The sensitivity analysis has been prepared based on March 31, 2011 balances and on the basis that the balances, the ratio of fixed to floating rates of debt and the derivative at March 31, 2011 are all constant. Excluded from this analysis are all non-financial assets and liabilities that are not classified as financial instruments and financial instruments not carried at fair value in the consolidated financial statements.

The sensitivity analysis provided is hypothetical and should be used with caution as the impacts provided are not necessarily indicative of the actual impacts that would be experienced as the Company's actual exposure to market rates may change. Changes in fair values or cash flows based on a variation in a market variable cannot be extrapolated because the relationship between the change in the market variable and the change in fair value or cash flows may not be linear. In addition, the effect of a change in a particular market variable on fair values or cash flows is calculated without considering interrelationships between the various market rates or mitigating actions that would be taken by the Company.

		Interest rate risk	
		-1%	**+1%**
	Carrying value	**Income**	**Income**
Financial Assets:			
Cash and cash equivalents	16,299	(17)	35
Financial Liabilities:			
Interest rate swap contract	164	(71)	71

Fair value hierarchy

Financial instruments carried at fair value have been categorized under the three levels of fair value hierarchy as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities

This level of the hierarchy includes cash and cash equivalents. The fair value of the instrument is quoted prices where the prices represent those at which regularly and recently occurring transactions take place.

Level 2: Inputs that are observable for the assets or liabilities either directly or indirectly

This level of the hierarchy includes the interest rate swap contract. This instrument is recorded at fair value on the settlement date. The fair value of the interest rate swap contract is calculated through discounting future expected cash flows using the bankers' acceptance ("BA") based swap curve. Since the BA based swap curve is an observable input, these financial instruments are considered Level 2.

Level 3: Inputs for assets or liabilities that are not based on observable market data

The Company does not have any financial instruments in this level.

	Financial instruments at fair value			
	Level 1	**Level 2**	**Level 3**	**Total**
Financial Assets:				
Cash and cash equivalents	16,299	-	-	16,299
Financial Liabilities:				
Interest rate swap contract	-	164	-	164

6 Capital management

The Company defines its capital as its long-term debt, shareholders' equity and cash and cash equivalents.

The Company's objectives when managing capital are to: (i) maintain a capital structure that provides financing options to the Company when a financing or a refinancing need arises to ensure access to capital, on commercially reasonable terms, without exceeding its debt capacity; (ii) maintain financial flexibility in order to preserve its ability to meet financial obligations, including debt servicing payments and dividend payments; and (iii) deploy capital to provide an appropriate investment return to its shareholders.

The Company's financial strategy is designed to maintain a flexible capital structure consistent with the objectives stated above and to respond to changes in economic conditions. In order to maintain or adjust its capital structure, the Company may issue additional shares, issue additional debt, issue debt to replace existing debt with similar or different characteristics, and adjust the amount of dividends paid to the Company's shareholders. The Company's financing and refinancing decisions are made on a specific transaction basis and depend on such things as the Company's needs and market and economic conditions at the time of the transaction.

The Board of Directors reviews the level of monthly dividends paid on a quarterly basis. The long-term debt is collateralized by all assets of LSCLP and the subsidiary partnerships and guaranteed by the subsidiary partnerships totalling $538,014. Under its Master Trust Indenture, LSCLP is subject to certain financial and non-financial covenants including a debt service coverage ratio defined as income from operations and construction funding ("EBITDA") to debt service. The Company is in compliance with all financial covenants on its borrowings as of March 31, 2011. However, there can be no assurance future covenant requirements will be met. If the Company does not remain in compliance, its ability to amend the covenants or refinance its debt could be affected.

There were no changes in the Company's approach to capital management during the period.

7 Acquisition

On March 23, 2010, the Company acquired 100% ownership interest in LSCLP. The acquisition occurred on the date of closing the Company's IPO and through the indirect acquisition of all of the outstanding limited partnership interests in LSCLP and the common shares of Leisureworld Senior Care GP Inc., the general partner of LSCLP. Goodwill in the amount of $91,466 was recognized as the difference between the fair value of assets and liabilities acquired and the consideration paid. None of the goodwill recognized is expected to be deductible for tax purposes.

The following table summarizes the consideration paid for LSCLP and the amounts of assets acquired and liabilities assumed that were recognized at the acquisition date.

Consideration	
Cash payment to Macquarie Long Term Care LP	112,517
Cash payment to Trustee	95
Non-interest bearing promissory note issued to Macquarie Long Term Care LP	9,035
Cash assumed	(14,762)
Total consideration transferred	**106,885**

The total purchase price of $121,647 was allocated to the assets and liabilities as follows:

Assets	
Cash	14,762
Accounts receivable and other assets	4,222
Prepaid expenses and deposits	1,045
Due from Leisureworld Senior Care Corporation	4,469
Government funding receivable	2,008
Construction funding receivable	84,394
Annuity	1,002
Property and equipment	299,639
Intangible assets - Licences	76,000
Intangible assets - Resident relationships	26,190
Intangible assets - Service contracts	3,080
Intangible assets - Software	1,196
Goodwill	91,466
Total assets	**609,473**
Liabilities	
Accounts payable and accrued liabilities	37,522
Government funding payable	11,990
Deferred income tax liabilities, net	79,092
Long-term debt	356,937
Interest rate swap contracts	2,285
Total liabilities	**487,826**
Net assets acquired	**121,647**

Additional consideration in the amount of $9,035 was also provided by way of a non-interest bearing promissory note to Macquarie Long Term Care LP. As part of the IPO, the underwriters were granted an overallotment option to purchase an additional 958,649 shares of the Company at $10.00 per share, less the underwriters' fees, within 30 days from the date of the IPO. The promissory note was settled by way of issuance of common shares of the Company as the overallotment option was not exercised within 30 days of the IPO.

All or substantially all of the revenue and net loss of the Company arise from the acquisition, as it had no significant activities previously. If the acquisition had taken place on January 1, 2010, the revenue and net loss for the quarter ended March 31, 2010 would have been $65,152 and $1,473, respectively.

11 Goodwill

Cost and carrying value, at February 10, 2010	-
Acquisition of Leisureworld Senior Care LP	**91,466**
Cost and carrying value, at December 31, 2010 and March 31, 2011	**91,466**

Goodwill acquired in business combinations is allocated to the CGUs that are expected to benefit from that business combination. CGUs are the smallest identifiable group of assets, liabilities and associated goodwill that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The Company has determined that each LTC home, the retirement residence, the independent living residence and PHCS are CGUs for goodwill impairment testing purposes. The Company tests goodwill annually for impairment, or more frequently if there are indications that goodwill might be impaired. An impairment loss is recognized if the carrying value of a CGU exceeds its recoverable amount.

The recoverable amount of the CGU is determined from fair value less costs to sell ("fair value"). Fair value is determined as the present value of the estimated future cash flows expected to arise from the continued use of the asset, including any expansion prospects, and its eventual disposal. These cash flows are discounted by an appropriate discount rate to arrive at net present value of the asset. In assessing fair value, the estimated future cash flows are derived from the most recent financial budget and long-range forecasts including an assumed growth rate. For the 2010 annual goodwill impairment analysis, the Company used an average post-tax equity discount rate of approximately 10% across the CGUs and an average growth rate of 2% before considering expansion projects. The Company has not recognized any impairment losses.

12 Long-term debt

	Interest rate	Maturity date	March 31, 2011	December 31, 2010
Series A Senior Secured Notes	4.814%	Nov. 24, 2015	299,014	298,496

The Company has 4.814% Series A Senior Secured Notes (the "2015 Notes") due November 24, 2015 with a face value of $310,000, collateralized by the assets of LSCLP and its subsidiary partnerships and guaranteed by the subsidiary partnerships.

The 2015 Notes may be redeemed in whole or in part at the option of the Company at any time, upon not less than 30 days' and not more than 60 days' notice to the holders of the 2015 Notes. The redemption price is the greater of: (i) the face amount of the 2015 Notes to be redeemed; and (ii) the price that will provide a yield to the remaining average life of such 2015 Notes equal to the Canada Yield Price plus 0.18%, in each case together with accrued and unpaid interest.

Interest on the long-term debt is payable semi-annually in arrears on May 24 and November 24 of each year. Interest expensed on the long-term debt for the quarter ended March 31, 2011 and period ended March 31, 2010 was $4,198 and $414, respectively, which includes non-cash interest of $518 and $50, respectively.

The following summarizes the components of interest expense, net, in the consolidated statement of operations and comprehensive loss:

	Quarter Ended March 31, 2011	From Incorporation, February 10, 2010, to March 31, 2010
Finance costs		
Interest expense on long-term debt	**3,680**	364
Interest expense on revolving credit facility	**11**	5
Accretion of the fair value increment on long-term debt	**518**	50
Net settlement payment on interest rate swap contract	**62**	10
	4,271	429
Finance income		
Interest income on construction funding receivable	**788**	77
Other interest income	**21**	-
Amortization of deferred finance gains	**-**	1
	809	78
Net finance charges	**3,462**	351

13 Revolving credit facility

LSCLP has a $10,000 revolving credit facility with a Canadian chartered bank, collateralized by the assets of LSCLP and its subsidiary partnerships of $538,014 and guaranteed by the subsidiary partnerships, which it can access for working capital purposes. The facility bears interest on cash advances at 175 basis points ("bps") per annum over the floating BA rate (30, 60 or 90 days), or at 75 bps per annum over the prime rate and on letters of credit at 175 bps per annum. As at March 31, 2011, the Company had $68 (December 31, 2010 - $68) in a letter of credit outstanding. The amount had been issued to a municipality with respect to outstanding obligations of the Company related to the construction of an LTC home (Note 21). During the quarter ended March 31, 2011, charges related to standby fees totalled $11 (period ended March 31, 2010 - $5).

14 Income taxes

	Quarter Ended March 31, 2011	From Incorporation, February 10, 2010, to March 31, 2010
Current income tax expense:		
Current income tax charge	**452**	86
Total current income tax	**452**	86
Deferred income tax expense recovery:		
Origination and reversal of temporary differences	**(1,654)**	(217)
Total deferred income tax	**(1,654)**	(217)
Income tax recovery	**(1,202)**	(131)

Total income tax recovery for the period can be reconciled to the loss in the consolidated statement of operations and comprehensive loss as follows:

	Quarter Ended March 31, 2011	From Incorporation, February 10, 2010, to March 31, 2010
Loss before income taxes	**(4,066)**	(457)
Canadian combined income tax rate	**28.3%**	31.0%
Income tax recovery	**(1,151)**	(142)
Adjustments to income tax provision:		
Non-deductible items	**41**	102
Other items	**(92)**	(91)
Income tax recovery	**(1,202)**	(131)

The following are the major deferred tax liabilities recognized by the Company and movements thereon during the period:

	Accelerated tax depreciation	Intangible assets	Share issuance	Construction funding interest	Other	Total
As at February 10, 2010	-	-	-	-	-	-
Due to acquistion of LSCLP	(62,320)	(17,986)	-	6,206	(4,992)	(79,092)
Credit/(charge) to income	2,516	3,394	(744)	(881)	381	4,666
Credit/(charge) to equity	-	-	4,200	-	-	4,200
As at Decemer 31, 2010	(59,804)	(14,592)	3,456	5,325	(4,611)	(70,226)
Credit/(charge) to income	885	997	(218)	(70)	60	1,654
As at March 31, 2011	**(58,919)**	**(13,595)**	**3,238**	**5,255**	**(4,551)**	**(68,572)**

The following chart details the reversal of the recognized deferred tax liabilities.

	March 31, 2011	December 31, 2010
Within one year	**(4,553)**	(4,988)
One to four years	**(7,178)**	(10,445)
After four years	**(56,841)**	(54,793)
Total	**(68,572)**	(70,226)

15 Share capital

Authorized
Unlimited number of common shares without nominal or par value

Issued and outstanding
Common shares

	Common shares	Amount
Balance, February 10, 2010	-	-
Issued common shares	19,020,000	178,768
Issued common shares in exchange for note payable	958,649	9,035
Share-based compensation (Note 17)	130,000	714
Balance, December 31, 2010	20,108,649	188,517
Share-based compensation (Note 17)	-	125
Balance, March 31, 2011	**20,108,649**	**188,642**

During the period ended December 31 2010, the Company issued 19,020,000 shares for proceeds of $178,768, net of underwriters' fees of $10,937, other IPO related costs of $4,695 and the related future tax impact of $4,200. The number of shares above includes 66,667 shares that have not fully vested in accordance with the stock-based compensation agreement (Note 17). In addition, 958,649 shares were issued to settle a note payable of $9,035.

There are no dilutive instruments outstanding at this time.

16 Dividends

The Company paid dividends at $0.07 per month per common share totalling $4,271 for the quarter ended March 31, 2011 (period ended March 31, 2010 - $nil). Dividends of $1,423 have been recognized in the consolidated balance sheet as accounts payable as of March 31, 2011 (December 31, 2010 - $1,423).

17 Share-based payments

Share-based payments were introduced by the Company in relation to the IPO, at which time 130,000 shares were awarded to certain key executives. The Company does not have a recurring share-based plan in place.

Of this amount, 30,000 shares were awarded for nominal value and had trading restrictions imposed on them for a period of six months. These shares vested immediately upon issuance. The remaining 100,000 shares vest in three equal installments on the first, second and third anniversary of the grant date and also have trading restrictions imposed. The fair value of these shares was determined to be approximately $1,147 based on the Black-Scholes option pricing model. Share-based compensation expense of $125 for the quarter ended March 31, 2011 (period ended March 31, 2010 - $330) was recognized in general and administrative expenses with a corresponding increase in shareholders' equity.

A summary of the movement of the shares granted is as follows:

	Shares awarded	Weighted average exercise price (dollars)
Balance, February 10, 2010	-	N/A
Granted	130,000	N/A
Vested	(30,000)	N/A
Unvested, December 31, 2010	100,000	N/A
Vested	(33,333)	N/A
Unvested, March 31, 2011	**66,667**	**N/A**

The fair value of the shares granted was calculated using the Black-Scholes option pricing model. The assumptions used in the model were as follows:

Risk-free rate	1.42%
Exercise price	$0.00
Expected life (in years)	0 - 3
Weighted average fair value of shares granted	$8.82
Expected dividend yield	8.50%

18 Employee benefits

Payroll costs for all employees including key management consist of:

	Quarter Ended March 31, 2011	From Incorporation, February 10, 2010 to March 31, 2010
Salaries and short-term employee benefits	**43,015**	4,068
Post-employment benefits	**982**	93
Termination benefits	**77**	-
Share-based payments	**125**	330
	44,199	4,491

The Company contributes to certain of its employees' defined contribution pension plans based on 4% of gross wages.

19 Key management compensation

The remuneration of key management is set out below in aggregate for each of the categories specified in IAS 24, Related Party Disclosures.

	Quarter Ended March 31, 2011	From Incorporation, February 10, 2010 to March 31, 2010
Salaries and short-term employee benefits	**453**	45
Share-based payments	**125**	330
	578	375

20 Commitments

As at March 31, 2011, the Company had $68 (December 31, 2010 - $68) in a letter of credit outstanding. The amount had been issued to a municipality with respect to outstanding obligations of the Company related to the construction of an LTC home.

The Company has a ten-year lease with respect to its corporate office; the lease expires on December 31, 2015. The Company also has various operating leases for office and other equipment. Lease payments in respect of the remaining years of the leases are as follows:

2011	392
2012	440
2013	403
2014	350
2015	348
Thereafter	-
	1,933

On June 22, 2010, the Company announced an agreement to acquire 88 LTC licences from Christie Gardens Apartments and Care Inc., conditional on approval by the MOHLTC. These licences are in the Toronto area and will increase the total number of the Company's LTC beds by approximately 2%. According to the terms of the agreement, the licences will be acquired by March 31, 2013 at a cost of $2,200.

21 Construction funding receivable

The MOHLTC provides funding to new homes constructed after April 1, 1998. Under the development agreements, these new homes receive a 20-year commitment from the MOHLTC to provide per diem funding of up to $10.35 per bed, depending on actual construction costs. The construction funding receivable is measured at amortized cost using the effective interest method. The fair value will differ from the carrying value due to changes in interest rates.

The Company will receive gross funding from the Ontario government of approximately $99,747 (December 31, 2010 - $101,879) related to the construction costs of LTC homes. The amounts are non-

interest bearing and will be received for certain LTC homes for various periods ending over the next 16 years.

Included in net interest expense is interest accretion on the construction funding receivable of $788 for the quarter ended March 31, 2011 and $77 for the period ended March 31, 2010.

22 Employee pension plan

The Company contributes to certain of its employees' defined contribution pension plans based on 4% of gross wages. The expense associated with these plans for the quarter ended March 31, 2011 was $982 (period ended March 31, 2010 - $93).

23 Trust funds

The Company maintains separate trust accounts on behalf of its LTC home residents, which are not included in these consolidated financial statements. The total balance in the trust bank accounts as at March 31, 2011 was $1,035 (December 31, 2010 - $1,186).

24 Related party transactions

During the quarter ended March 31, 2011, the Company earned revenue from Spencer House Inc., a charitable organization that owns a licence to operate an LTC home in Orillia, Ontario. A subsidiary of the Company has been contracted to manage the operations of Spencer House Inc. Total revenue for the quarter ended March 31, 2011 was $473 (period ended March 31, 2010 - $40). Included in accounts receivable is $221 owing from Spencer House Inc. at March 31, 2011 (December 31, 2010 - $53). These transactions are in the normal course of operations and have been valued in these consolidated financial statements at the exchange amount, which is the amount of consideration established and agreed to by the management of the related parties.

25 Economic dependence

The Company holds licences related to each of its LTC homes and receives funding from the MOHLTC related to these licences. Funding is received on the 22nd of each month. During the quarter ended March 31, 2011, the Company received approximately $49,540 (period ended March 31, 2010 - $nil) in respect of these licences for operating revenues and other MOHLTC funded initiatives.

26 Segmented information

Segmented information is presented in respect of the Company's business segments. The primary format, business segments, is based on the Company's management and internal reporting structure. The Company operates solely within Canada, hence no geographical segment disclosures are presented. Inter-segment pricing is determined on an arm's length basis. Segment results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly interest bearing loans, borrowings and expenses, corporation taxes and corporate assets and expenses.

The Company is comprised of the following main business segments:

- Leisureworld LTC business – which is the core business of the Company and also reflects corporate office costs; and

- PHCS – PHCS retains its own management team and compiles its own financial information. PHCS is an accredited provider of professional nursing, personal support and education services for both community-based home care and LTC homes.

The significant accounting policies of the reportable operating segments are the same as those disclosed in Note 3.

	Quarter Ended March 31, 2011			From Incorporation, February 10, 2010, to March 31, 2010		
	PHCS	LTC	Total	PHCS	LTC	Total
Gross revenue	2,888	71,270	74,158	294	6,386	6,680
Less: Internal revenue	485	5,933	6,418	45	225	270

Purchase of intangible assets	-	126	126	-	48	48

27 Contingencies

The former majority owner of Leisureworld is involved in a lawsuit with a former supplier, Corporate Building Services Inc. (the "CBSI Claim"). The CBSI Claim is for $5,860; the outcome cannot be determined at the date of approval of these consolidated financial statements. Markham Suites Hotel Limited ("MSHL"), formerly Leisureworld Inc., whose assets were acquired by LSCLP (October 18, 2005), was added as a defendant during 2006. The Company intends to vigorously defend MSHL's position in this action, as this potential liability was assumed by the Company as part of the acquisition. In the Company's opinion, the resolution of this action will not have a material adverse effect on the consolidated financial condition of the Company. The defendants will be denying all allegations and asserting the action should be dismissed with costs payable to the defendants.

28 Subsequent events

On April 27, 2011, the Company's subsidiary, The Royale LP ("Royale"), completed the acquisition of two retirement residences comprising 294 suites, for a net purchase price of $89,000 after working capital adjustments and a holdback of $5,500 to be held in escrow as an income guarantee to complement cash flow from the properties during the lease-up period.

Royale is a limited partnership that was formed under the laws of the Province of Ontario on March 17, 2011. The sole general partner of Royale is The Royale GP Corporation ("Royale GP"), a corporation incorporated under the laws of the Province of Ontario on March 16, 2011. The Company holds all of the issued and outstanding shares of Royale GP and the limited partnership interest in Royale.

To partly finance the purchase price, the Company entered into a two-year Bridge Loan with a Canadian chartered bank in the amount of $55,000. The Bridge Loan is secured by the assets of the Royale and guaranteed by the Company and is subject to certain customary financial and non-financial covenants. The Company entered into an interest rate swap contract to substantially fix the interest rate payable on the Bridge Loan at 4.045%. The balance of the purchase price was funded from the net proceeds of a public offering of subscription receipts, completed on April 27, 2011, which raised gross proceeds of approximately $46,000. On closing of the acquisition, one common share was automatically issued in exchange for each outstanding subscription receipt, resulting in the issuance of 4,381,500 common shares.
